Week 3 Day 1 – Persist PUMP LIFT 5x

A) Daily Focus Notes:
Incline Prone Dumbbell Row Advantage
The Incline Prone Dumbbell Row is great for building your back, especially when your lower back is already tired from other lifts. Lying face down on the bench supports your body, so you can focus on working your lats, mid-back, and rear shoulders.
Pull your elbows toward your hips and lower the weights slowly. This helps you get a strong back workout without putting stress on your lower back.
Short on Time? Remove Finisher.

B) Warmup (8 min):

Week 3 Day 7 – Persist PUMP LIFT 5x
WORK IN LESSON

I'm never going to tell you or any of my clients not to eat a brownie, or to cut out entire groups of foods. Life would be sad without brownies, and guess what - it doesn't work anyway. How many people who cut out all carbs are still going strong on that years later?

How about this: you can have anything you love. But if you want a better body composition, you just can't have it all at once.

Dial up the frequency and quantity of foods that keep you moving towards your goals. And dial down the frequency and quantity of ones that don't. It's a lot more sustainable in the long run.

With love,

Marcus

Week 3 Day 5 - Persist PUMP LIFT 4x

A) Daily Focus Notes: Focus on RDL Technique
This week's focus is on learning solid form in the Romanian Deadlift (RDL). Hinge from your hips, not your knees — think about pushing your hips back until you feel a stretch in your hamstrings. Keep your back flat and the bar close to your legs the whole time. Don't let the weight drift forward, or it can stress your lower back.
Move slowly and stay in control. Every rep should feel strong, steady, and smooth from start to finish.
Short on Time? Remove Finisher.

B) Warmup (8 min):
3 Rounds
90 sec Cardio of Choice
Alternating Landmine Rotational Deadlift; 6/side

Week 3 Day 7 - Persist PUMP LIFT 4x
WORK IN LESSON

I'm never going to tell you or any of my clients not to eat a brownie, or to cut out entire groups of foods. Life would be sad without brownies, and guess what - it doesn't work anyway. How many people who cut out all carbs are still going strong on that years later?

How about this: you can have anything you love. But if you want a better body composition, you just can't have it all at once.

Dial up the frequency and quantity of foods that keep you moving towards your goals. And dial down the frequency and quantity of ones that don't. It's a lot more sustainable in the long run.

With love,
Marcus

Week 3 Day 1 – Persist PUMP LIFT 3x

A) Daily Focus Notes: Bench Press Rep Progression
This week your bench press reps increase, and the goal is to match the same weight used in Week 1 while hitting the new rep target. This builds both strength endurance and control under fatigue. Focus on keeping each rep consistent — no bouncing off the chest, and keep the bar path steady. Small weekly progressions like this lead to big strength gains over time.
Short on Time? Remove Finisher.

B) Warmup (8 min):
3 Rounds
90 sec Cardio of Choice
Glute Bridge DB Floor Press; 10 reps
KB Bottoms Up Carry; 20m/side

Week 3 Day 3 – Persist PUMP LIFT 3x

A) Daily Focus Notes: Incline Prone Dumbbell Row Advantage
The Incline Prone Dumbbell Row is great for building your back, especially when your lower back is already tired from other lifts. Lying face down on the bench supports your body, so you can focus on working your lats, mid-back, and rear shoulders.
Pull your elbows toward your hips and lower the weights slowly. This helps you get a strong back workout without putting stress on your lower back.
Short on Time? Remove Finisher.

B) Warmup (8 min):

Week 3 Day 5 – Persist PUMP LIFT 3x

A) Daily Focus Notes: Barbell Z Press: Overhead Strength with Core Control
The Barbell Z Press teaches you to press overhead while keeping your core tight and stable. Sitting tall with your legs straight takes away any help from your lower body, forcing your abs and upper back to work harder. The ab engagement also teaches good ribcage mechanics for the overhead press. This move builds true pressing strength and better body control.
Short on Time? Remove Finisher.

Burpee to Bike Chipper
Daily Focus Note:
Today's conditioning piece mixes power, control, and grit. You'll start and finish with big efforts — the burpees and the bike — while the middle section tests your ability to stay composed under fatigue. The Devils Press will challenge your full body strength, and the Star Plank will train your core to stay tight even when you're breathing hard. Think of this workout as a wave: start strong, stay steady through the middle, and finish fast. Focus on good movement quality while keeping your effort consistent from start to finish.

Week 3 Day 3 – Persist PUMP CONDITION 5x
Building Strength and Endurance Together
Daily Focus Note:
Today's conditioning blends lower body strength and aerobic power. Each 6-minute AMRAP (As Many Rounds/Reps as Possible) challenges you to keep a steady, strong pace. The dumbbell lunges and step-ups build single-leg stability and strength, while the bike adds a smooth cardio push. Use what you learned from earlier interval workouts to pace smart — start at about 85% effort and aim to stay consistent across both AMRAPs. This piece will test your ability to move well under fatigue without slowing down.
Short on Time? Reduce AMRAPs to 4 minutes.
Warm-up (8 min)

Week 3 Day 6 – Persist PUMP CONDITION 5x
Controlled Grind for Strength and Stability
Daily Focus Note:
Today's workout is designed to challenge your strength and focus, not your speed. The goal is to move with control and steady effort for the full 12 minutes. The wall sit and carries will make your legs and core burn, while the kettlebell swings and lunges build endurance and stability. Stay calm, breathe through the tension, and focus on keeping good positions rather than rushing. Think of this as a grind-style workout — strong, steady, and unbroken movement from start to finish.
Short on Time? Reduce Strength Balance to 2 sets.
Warm-up (8 min)
3 Rounds
90 sec Cardio of Choice
1) Alternating Landmine Rotational Deadlift; 6/side

Week 3 Day 7 – Persist PUMP CONDITION 5x
WORK IN LESSON
I'm never going to tell you or any of my clients not to eat a brownie, or to cut out entire groups of foods. Life would be sad without brownies, and guess what - it doesn't work anyway. How many people who cut out all carbs are still going strong on that years later?

How about this: you can have anything you love. But if you want a better body composition, you just can't have it all at once.

Dial up the frequency and quantity of foods that keep you moving towards your goals. And dial down the frequency and quantity of ones that don't. It's a lot more sustainable in the long run.

With love,
Marcus

Week 3 Day 1 - Persist PUMP CONDITION 4x

A) Daily Focus Notes: Bench Press Rep Progression
This week your bench press reps increase, and the goal is to match the same weight used in Week 1 while hitting the new rep target. This builds both strength endurance and control under fatigue. Focus on keeping each rep consistent — no bouncing off the chest, and keep the bar path steady. Small weekly progressions like this lead to big strength gains over time.
Short on Time? Reduce Conditioning to 9-12 minutes.

B) Warmup (8 min):
3 Rounds
90 sec Cardio of Choice
Glute Bridge DB Floor Press; 10 reps
KB Bottoms Up Carry; 20m/side

C) Strength Intensity 1 (12 min):
Close Grip Barbell Bench Press
4 Working Sets; rest 2 minutes
Warm-Up Set - 10 reps @ 22X1 Tempo - Easy
Working Set 1 - 8 @ 22X1 - RPE 7
Working Set 2 - 8 @ 22X1 - RPE 8
Working Set 3 - 8 @ 22X1 - RPE 9
Working Set 4 - Use the same weight as previous sets and perform Max Unbroken reps @20X1 (No Pauses at Bottom)
Loading Note:
Keep weight the same for all sets. The accumulated fatigue will lead to an increase in RPE (Rate of Perceived Exertion - scale of 10 where 10 is form failure). Aim to match weight from Week 1. The reps have increased from 6->8.

D) Strength Balance (15 min):
3-4 sets
Supinated Barbell Row; 8 reps @21X1
rest 30-60 sec
Pronated Strict Pullup; 6-10 reps @30X0
rest 60-90 sec and back to 1.

Loading Note:
Aim for each set to be close to failure.

E) Overhead Intervals (12-15 min):
Every 60 sec x 12-15 sets
Min 1) 5 Right Arm KB Push Press + 20m KB Overhead Carry + 5 Left Arm KB Push Press + 20m KB Overhead Carry (53/35)
Min 2) 5/side Single Arm KB Turkish Sit Up (35/26)
Min 3) Row 8-12 Cals
Effort Note:
Perform at a controlled pace to give yourself a small amount of rest time between each minute. The first rounds may feel easy, but they should gradually get more challenging.

F) Cooldown (5 min):

Scorpion Chest Stretch; 30 sec/side
Banded Single Arm Behind the Back Stretch; 30 sec/side
Passive Hang; 30 sec

Week 3 Day 2 - Persist PUMP CONDITION 4x

A) Daily Focus Notes: Building Strength and Endurance Together
Today's conditioning blends lower body strength and aerobic power. Each 6-minute AMRAP challenges you to keep a steady, strong pace. The dumbbell lunges and step-ups build single-leg stability and strength, while the bike adds a smooth cardio push. Use what you learned from earlier interval workouts to pace smart — start at about 85% effort and aim to stay consistent across both AMRAPs. This piece will test your ability to move well under fatigue without slowing down.
Short on Time? Reduce AMRAPs to 4 minutes.

B) Warmup (8 min):
2 min Cardio of Choice
+
3 Sets
Goblet Heel Sits; 10 reps
Landmine Lateral Lunge with Rotation; 5-7 reps/side

Working Set 2 - 3.3.3 @ 20X1 - RPE 8
Working Set 3 - 3.3.3 @ 20X1 - RPE 9
Rep Scheme Note:
3.3.3 Cluster Set = Perform the first 3 reps, rack the bar and rest 15sec, perform the next 3 reps, rack the bar and rest 15sec, perform the last 3 reps. Each set is 9 total reps with rest between every 3 reps.

D) Strength Balance (12 min):

rest 45 sec
L Sit or Tuck L Sit on Parallettes; 10-20 sec
rest 45 sec and back to 1.
Loading Note:
For the nordic hamstring curl, use assistance as needed to match the prescription. The reps have decreased allowing for a decrease in assistance. Other hamstring curl variations may be subbed in place of the nordic hamstring curl. Aim for each set to be close to failure. The sets have increased from Week 1+2.

E) Interval Lower Body Weight Training (15min):
6 min AMRAP @85% effort (As Many Rounds/Reps As Possible)
12 DB Suitcase Reverse Lunges (50/35)

rest 2 min
6 min AMRAP @85% effort
12 DB Rack Box Step Up (50/35) (16-20")

Week 3 Day 1 - Persist PERFORM

A) Daily Focus Notes: Burpee to Bike Chipper
Today's conditioning piece mixes power, control, and grit. You'll start and finish with big efforts — the burpees and the bike — while the middle section tests your ability to stay composed under fatigue. The Devil's Press will challenge your full body strength, and the Star Plank will train your core to stay tight even when you're breathing hard. Think of this workout as a wave: start strong, stay steady through the middle, and finish fast. Focus on good movement quality while keeping your effort consistent from start to finish.

Week 3 Day 2 - Persist PERFORM

A) Daily Focus Notes: Bench Press Rep Progression
This week your bench press reps increase, and the goal is to match the same weight used in Week 1 while hitting the new rep target. This builds both strength endurance and control under fatigue. Focus on keeping each rep consistent — no bouncing off the chest, and keep the bar path steady. Small weekly progressions like this lead to big strength gains over time.
Short on Time? Reduce Conditioning to 9-12 minutes.

B) Warmup (8 min):
3 Rounds
90 sec Cardio of Choice
Glute Bridge DB Floor Press; 10 reps
KB Bottoms Up Carry; 20m/side

C) Jerk Progression (12 min):

Week 3 Day 3 - Persist PERFORM

A) Daily Focus Notes: Building Strength and Endurance Together
Today's conditioning blends lower body strength and aerobic power. Each 6-minute AMRAP challenges you to keep a steady, strong pace. The dumbbell lunges and step-ups build single-leg stability and strength, while the bike adds a smooth cardio push. Use what you learned from earlier interval workouts to pace smart — start at about 85% effort and aim to stay consistent across both AMRAPs. This piece will test your ability to move well under fatigue without slowing down.
Short on Time? Reduce AMRAPs to 4 minutes.

B) Warmup (8 min):

Week 3 Day 4 - Persist PERFORM
Active Recovery Day

A) Active Recovery Work:
Goal: Complete 30 minutes of low-intensity steady-state movement today. Go for a jog, hike, walk, ruck, bike, or swim. If you want a GYM OPTION, please use the following. You should keep your heart rate in the Zone 2 range. That can be calculated roughly as 65-75% of your theoretical maximal HR (220-age). Be mindful not to push your intensity too high. Small spikes in heart rate are fine. Just don't attempt to trash your body or muscles.
Run/Bike/Row 60 sec @75% effort

x 6 Sets
Then 2 Sets:
6 DB Snatch High Pull Right
6 DB Snatch Right
6 DB Press Right

Week 3 Day 6 - Persist PERFORM

A) Daily Focus Notes: Controlled Grind for Strength and Stability
Today's workout is designed to challenge your strength and focus, not your speed. The goal is to move with control and steady effort for the full 15 minutes. The wall sit and carries will make your legs and core burn, while the kettlebell swings and lunges build endurance and stability. Stay calm, breathe through the tension, and focus on keeping good positions rather than rushing. Think of this as a grind-style workout — strong, steady, and unbroken movement from start to finish.
Short on Time? Remove Strength Balance.

Week 3 Day 7 - Persist PERFORM
WORK IN LESSON

I'm never going to tell you or any of my clients not to eat a brownie, or to cut out entire groups of foods. Life would be sad without brownies, and guess what - it doesn't work anyway. How many people who cut out all carbs are still going strong on that years later?

How about this: you can have anything you love. But if you want a better body composition, you just can't have it all at once.

Dial up the frequency and quantity of foods that keep you moving towards your goals. And dial down the frequency and quantity of ones that don't. It's a lot more sustainable in the long run.

With love,
Marcus
