Week 2 Day 1 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Back Squat Progression
Back squats are higher reps this block to rebuild a strong base. We didn't use the back squat at all last training block, so the added volume helps you re-familiarize with the movement before we push intensity later.
Short on time? Remove Finisher.

B) Warmup (8 min):
3 Rounds
90 sec Cardio of Choice
Banded Reverse Nordics; 6-8 reps
Lower Switch Cossack Squat; 6 reps/side
Dual KB Rack Lateral Band Walk; 10 steps/side

RPE = Rate of Perceived Exertion, scale of 10 where 10 is form failure

D) Strength Intensity 2 (12-15 min):
3 sets; rest 60-75sec between all sides and sets
Single Leg Wall Press DB RDL; 8 reps/side @ 20X0 Tempo

Loading Note:

Week 2 Day 2 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Back Supported Pressing
The back support provides core stability, but the bigger benefit is that you can lean slightly into the bench. If shoulder mobility limits you overhead, this variation lets you press safely without needing to get the bar fully behind your head at the top.

Short on time? Remove Finisher.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
Bent Over Row Isometric; 15sec
Half Kneeling Bottoms Up KB Press; 6-8 reps/side

Week 2 Day 3 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Descending Rep Scheme for Pull Ups
Similar to the dips earlier this block, Pull Ups follow a descending rep scheme. To get the most out of it, aim to make each set more difficult — either by adding resistance or reducing assistance as the reps decrease.
Short on time? Remove Finisher.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
DB Seated Goodmorning 8-12 reps
KB Ballistic Row; 10 reps/side

Working Set 2 - 10 @ 20X1 Tempo - RPE 8
Working Set 3 - 8 @ 20X1 Tempo - RPE 9
Working Set 4 - Drop back to your Set 1 weight/assistance and perform Max Unbroken reps @20X1 (Aim for 8+ reps)
Loading Note:

If using Pull Ups instead of pulldowns, match band or machine assistance to prescription. Each set should decrease in assistance or increase in additional weight. For Set 4, drop back to your set 1 weight or assistance and perform as many reps as possible, aiming for 8 or more reps.

D) Strength Intensity 2 (12-15 min):
6 sets; rest 30-45sec rest between sets
T-Bar Row; 6 reps @ 20X0 Tempo
Loading Note:
This is a high density format, meaning a lot of reps with little rest. Select a weight that is consistent with 12-15 rep max for the prescribed movement.

Week 2 Day 5 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Snatch Grip RDL
Even if you never plan to snatch, the snatch grip RDL is worth your attention. The wider grip makes the upper back work harder and allows for a greater range of motion through the hinge. Focus on stretching as deep as you can without losing your low back position — the hips should be the only thing changing while the low back stays locked in.
Short on time? Remove Finisher.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
15 sec Cardio Sprint
Single Leg Hip Bridge Hold; 30 sec/side
Alternating Single Arm Split Stance KB Swing x 6-10 reps/side

C) Strength Intensity 1 (15 min):
Snatch Grip Romanian Deadlift
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @ 20X0 Tempo - Easy
Working Set 1 - 8 reps @ 20X0 Tempo - RPE 7
Working Set 2 - 8 reps @ 20X0 Tempo - RPE 8
Working Set 3 - 8 reps @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

Week 2 Day 6 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Barbell Bench Press
This block uses a higher tempo even on the traditional bench press. The @22X1 tempo means two seconds down, two seconds paused against the chest, explode up, one second at lockout.
That longer pause at the bottom increases demand on the shoulders and chest and reinforces strong positions in the hardest part of the lift.
Short on time? Remove Finisher.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
15 sec Cardio Sprint
90/90 Alternating DB Floor Press; 6 reps/side
Tall Kneeling KB Halo; 6 reps/side

C) Strength Intensity 1 (15 min):

Barbell Bench Press
4 Working Sets; rest 2-3 min
Warm-Up Set - 6 reps @ 22X1 Tempo - Easy
Working Set 1 - 6 reps @ 22X1 Tempo - RPE 7
Working Set 2 - 6 reps @ 22X1 Tempo - RPE 8
Working Set 3 - 6 reps @22X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @22X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Intensity 2 (12-15 min):
3 sets
Supinated Pull Up Isometric; 15-20sec
rest 15 sec
2. Supinated Strict Pull Up; 5-10 reps @21X2
rest 90 sec and back to 1.
Loading Note:
The Pull Up isometric is potentiating the regular Pull Ups. The Pull Up isometric should be "heavier" than the regular Pull Up. If you are able to complete 5-10 Tempo Bodyweight Pull Ups, add weight on the Pull Up isometric. If you are using band assistance for the tempo Pull Ups, attempt to perform the Pull Up isometric with bodyweight only.

E) Strength Balance (12 min):
3 sets
Seated DB Lateral Raise; 10 reps @ 30X0 Tempo
rest 30 sec
2. Pike Handstand Hold 15-25sec or Pike Strict Handstand Push Up; 5-8 reps @20X0

Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to form failure

F) Finisher (8-10 min):
2-3 sets
KB Front Raise; 10-12 @30X0
rest 30 sec
2. Half Kneeling KB Chop and Lift; 6-8 reps/side

Loading Note;
Aim for each set to be close to failure.

G) Cooldown (5 min):
1-2 sets
Band Single Arm Pec Stretch; 30 sec/side
Pretzel Stretch; 30 sec/side
PVC Prayer Stretch; 30-60 sec

Week 2 Day 7 - Persist PUMP LIFT 5x

There's a difference between being in the gym and actually training. If you're distracted - on your phone between every set, not really locked into what you're doing - you're limiting how much effort you can apply.

When you're here, be here. Know what you did last week, know what you're trying to hit today, and give your sets your full attention. Treat your training time like it matters, because it does. A focused 60 minutes will outperform a distracted 90 every time.

Warmly,
Marcus

Week 2 Day 7 - Persist PUMP LIFT 4x

There's a difference between being in the gym and actually training. If you're distracted - on your phone between every set, not really locked into what you're doing - you're limiting how much effort you can apply.

When you're here, be here. Know what you did last week, know what you're trying to hit today, and give your sets your full attention. Treat your training time like it matters, because it does. A focused 60 minutes will outperform a distracted 90 every time.

Warmly,

Week 2 Day 5 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Snatch Grip RDL
Even if you never plan to snatch, the snatch grip RDL is worth your attention. The wider grip makes the upper back work harder and allows for a greater range of motion through the hinge. Focus on stretching as deep as you can without losing your low back position — the hips should be the only thing changing while the low back stays locked in.
Short on time? Remove Finisher.

B) Warmup (8 min):

Week 2 Day 2 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Back Supported Pressing
The back support provides core stability, but the bigger benefit is that you can lean slightly into the bench. If shoulder mobility limits you overhead, this variation lets you press safely without needing to get the bar fully behind your head at the top.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice

Week 2 Day 3 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Descending Rep Scheme for Pull Ups

Similar to the dips earlier this block, Pull Ups follow a descending rep scheme. To get the most out of it, aim to make each set more difficult — either by adding resistance or reducing assistance as the reps decrease.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice

Working Set 4 - Drop back to your Set 1 weight/assistance and perform Max Unbroken reps @20X1 (Aim for 8+ reps)
Loading Note:
If using Pull Ups instead of pulldowns, match band or machine assistance to prescription. Each set should decrease in assistance or increase in additional weight. For Set 4, drop back to your set 1 weight or assistance and perform as many reps as possible, aiming for 8 or more reps.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10-12 min):

Week 2 Day 7 - Persist PUMP CONDITION 5x

There's a difference between being in the gym and actually training. If you're distracted - on your phone between every set, not really locked into what you're doing - you're limiting how much effort you can apply.

When you're here, be here. Know what you did last week, know what you're trying to hit today, and give your sets your full attention. Treat your training time like it matters, because it does. A focused 60 minutes will outperform a distracted 90 every time.

Warmly,
Marcus

Week 2 Day 1 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Back Squat Progression

Week 2 Day 4 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Snatch Grip RDL
Even if you never plan to snatch, the snatch grip RDL is worth your attention. The wider grip makes the upper back work harder and allows for a greater range of motion through the hinge. Focus on stretching as deep as you can without losing your low back position — the hips should be the only thing changing while the low back stays locked in.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
15 sec Cardio Sprint
Single Leg Hip Bridge Hold; 30 sec/side

Week 2 Day 5 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Barbell Bench Press
This block uses a higher tempo even on the traditional bench press. The @22X1 Tempo means two seconds down, two seconds paused against the chest, explode up, one second at lockout.
That longer pause at the bottom increases demand on the shoulders and chest and reinforces strong positions in the hardest part of the lift.

Week 2 Day 3 - Persist PERFORM

A) Daily Focus Notes:
Descending Rep Scheme for Pull Ups
Similar to the dips earlier this block, pull ups follow a descending rep scheme. To get the most out of it, aim to make each set more difficult — either by adding resistance or reducing assistance as the reps decrease.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
Dumbbell Seated Goodmorning 8-12 reps
Kettlebell Ballistic Row; 10 reps/side

RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

Loading Note: If using pull ups instead of pulldowns, match band or machine assistance to prescription. Each set should decrease in assistance or increase in additional weight. For Set 4, drop back to your set 1 weight or assistance and perform as many reps as possible, aiming for 8 or more reps.

Week 2 Day 5 - Persist PERFORM

A) Daily Focus Notes:
Snatch Grip RDL
Even if you never plan to snatch, the snatch grip RDL is worth your attention. The wider grip makes the upper back work harder and allows for a greater range of motion through the hinge. Focus on stretching as deep as you can without losing your low back position — the hips should be the only thing changing while the low back stays locked in.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
15 sec Cardio Sprint
Single Leg Hip Bridge Hold; 30 sec/side

Week 2 Day 6 - Persist PERFORM

A) Daily Focus Notes:
Barbell Bench Press

This block uses a higher tempo even on the traditional bench press. The @22X1 Tempo means two seconds down, two seconds paused against the chest, explode up, one second at lockout.
That longer pause at the bottom increases demand on the shoulders and chest and reinforces strong positions in the hardest part of the lift.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets

Week 2 Day 1 - Persist Minimalist

A) Daily Focus Notes:
1-1/4 Squat

The 1 1/4 squat technique is used to maximize time under tension, strengthen the "hole" (bottom position), and build explosive power. By descending fully, rising a quarter, returning to the bottom, and standing, it forces better postural strength and forces more quad, glute, and VMO development. Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
90 sec Cardio of Choice
Banded Reverse Nordics; 6-8 reps

Week 2 Day 2 - Persist Minimalist

A) Daily Focus Notes:

Week 2 Day 4 - Persist Minimalist

A) Daily Focus Notes:
DB RDL
Dumbbell (DB) RDLs offer superior hamstring and glute isolation by allowing a greater, more natural range of motion, keeping weight closer to the body to reduce lower back strain. Using dumbbells improves balance, fixes limb strength imbalances, and provides a safer, more consistent, and effective stimulus for muscle growth (hypertrophy) compared to the barbell.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
15 sec Cardio Sprint
