Pump Lift 5x

Monday, August 31st, 2026

Week 2 Day 1 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Pronated Pull Up + Ring Row
In this super set, the pronated pull up goes first at the harder grip position. After the short 15 second rest, move to the ring row, which shifts you into a more horizontal pulling angle, allowing you to continue accumulating reps after the vertical pull fatigues. The two angles hit the lats and the mid-back in one set, so you finish having trained the whole back through a full range.
Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):
2-3 Rounds
1. 90 sec Cardio of Choice
2. Supine Band Lat Pullover; 10-15 reps

Week 2 Day 2 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Seated Strict Press
The seated strict press removes any leg drive and forces the shoulders to do all the work overhead. Sitting also limits lower back compensation, which makes the demand on the deltoid more honest than a standing press. Four working sets with a max unbroken drop set at the end. Keep the bar

path vertical and brace the core on every rep.
Short on time? Remove Strength Balance, or Finisher based on your goals.

Week 2 Day 3 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Goblet Front Foot Elevated Split Squat
Elevating the front foot deepens the split squat, stretching the hip flexor of the back leg and increasing range of motion through the front knee. The goblet position keeps the torso upright and shifts the demand forward into the quad of the front leg. All reps are prescribed at RPE 8 to 10. These should be working hard from the first set. Keep the front heel planted throughout.
Short on time? Remove Strength Balance or Finisher based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Shinbox Hip Extension + Switch; 5 reps/side

Week 2 Day 5 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Single Arm DB Row
The single arm dumbbell row works each side independently through a long horizontal pulling range. Brace the non-working hand on a bench or knee and keep the hips square. The 20X1 tempo means pull fast, no pause at the top, then one second lower. Reps descend across the three working sets from 15 to 10 while RPE increases. Find a weight that challenges you by the final working set. Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. Diamond Plank; 30 sec
2. Banded YTW; 6-8 reps in each position

Saturday, September 5th, 2026

Week 2 Day 6 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Cyclist Front Squat
The cyclist front squat combines heel elevation with a front load position. Both the heel elevation and the front rack shift the demand almost entirely onto the quads. The front rack also demands significant engagement of the upper back and core to stay upright under load. Keep the elbows high throughout. If the elbows drop, the bar rolls forward, and the position collapses. All three working sets stay at the same reps with RPE building from 7 to 9.
Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Banded Reverse Nordics; 6-8 reps
3. Lower Switch Cossack Squat; 6 reps/side

Week 2 Day 7 - Persist PUMP LIFT 5x

Nutrition Myth: You have to eat perfectly clean to see results

The all or nothing mindset feels disciplined, but it usually backfires. You do great Monday through Friday, then the weekend hits and it all falls apart, and Monday you're starting over again. That cycle is exhausting and it's not sustainable. The people who actually get lasting results are the ones who can have a slice of pizza on a Friday night and just get back to their normal eating on Saturday morning, no guilt, no starting over. Flexibility isn't a lack of discipline, it's what makes consistency possible in real life. Perfect is the enemy of progress here.

Warmly, Marcus

A) Daily Focus Notes:
Suitcase Walking Lunge
Hold a dumbbell in each hand and lunge forward. Controlled step, drop the back knee, drive through the front heel. Keep your torso tall and your chest up so the load doesn't pull you forward. This is a great chance to use lifting straps so grip isn't the limiter; you want your legs to be what fatigues first, not your hands.
Short on time? Remove Strength Balance, or Finisher based on your goals.

Week 2 Day 7 - Persist PUMP LIFT 4x

Nutrition Myth: You have to eat perfectly clean to see results

The all or nothing mindset feels disciplined, but it usually backfires. You do great Monday through Friday, then the weekend hits and it all falls apart, and Monday you're starting over again. That cycle is exhausting and it's not sustainable. The people who actually get lasting results are the ones who can have a slice of pizza on a Friday night and just get back to their normal eating on Saturday morning, no guilt, no starting over. Flexibility isn't a lack of discipline, it's what makes consistency possible in real life. Perfect is the enemy of progress here.

Week 2 Day 1 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Pronated Pull Up + Ring Row
In this super set, the pronated pull up goes first at the harder grip position. After the short 15 second rest, move to the ring row, which shifts you into a more horizontal pulling angle, allowing you to continue accumulating reps after the vertical pull fatigues. The two angles hit the lats and the mid-back in one set, so you finish having trained the whole back through a full range.
Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Shinbox Hip Extension + Switch; 5 reps/side

Week 2 Day 3 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Goblet Front Foot Elevated Split Squat
Elevating the front foot deepens the split squat, stretching the hip flexor of the back leg and increasing the range of motion through the front knee. The goblet position keeps the torso upright and shifts the demand forward into the quad of the front leg. All reps are prescribed at RPE 8 to 10. These should be working hard from the first set. Keep the front heel planted throughout.
Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):

Week 2 Day 5 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Seated Strict Press
The seated strict press removes any leg drive and forces the shoulders to do all the work overhead. Sitting also limits lower back compensation, which makes the demand on the deltoids more honest than a standing press. Four working sets finishing with a max unbroken drop set at the end. Keep the bar path vertical and brace the core on every rep.
Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):

1. 90 sec Cardio of Choice
2. Supine Band Lat Pullover; 10-15 reps

Pump Condition 5x

Monday, August 31st, 2026

Week 2 Day 1 - Persist PUMP COND 5x

A) Daily Focus Notes:
Pronated Pull Up + Ring Row
In this super set, the pronated pull up goes first at the harder grip position. After the short 15 second rest, move to the ring row, which shifts you into a more horizontal pulling angle, allowing you to continue accumulating reps after the vertical pull fatigues. The two angles hit the lats and the mid-back in one set, so you finish having trained the whole back through a full range.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min)
2-3 Rounds
1. 90 sec Cardio of Choice
2. Supine Band Lat Pullover; 10-15 reps

1. Couch Stretch Rocks; 30 sec/side
2. Hip Sleeper Stretch; 30 sec/side
3. Single Arm Wall Prayer Stretch; 30 sec/side

Tuesday, September 1st, 2026

Week 2 Day 2 - Persist PUMP COND 5x

A) Daily Focus Notes:
Seated DB Press + Push Ups
This shoulder and chest giant set presses overhead first, then drops you into two push up variations back to back. Pressing first tires your shoulders out, so the push ups feel harder than usual even at just bodyweight. On the push ups you go from a wide deficit grip to a narrow grip, where the wide hands stretch the chest and the narrow hands shift the load to your triceps. Keep the rest short and push each move close to failure.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min)
2 min Cardio of Choice
2-3 Sets
1. Banded Shoulder External Rotation; 10-15 reps/side

rest 90 sec and back to 1.

1min Ring Plank or Tall Plank
3 Wall Walks or 6 Inchworms

Effort Note:
Isometrics are heavily underrated in most training programs. In this section the continuous movement keeps the heart rate high, and the isometrics build strength without sacrificing quality or your joints in the process. Aim for a consistent pace with about 60 sec rest between sets.

F) Cooldown (5 min)

1-2 sets
1. Sidelying 90/90 Thoracic Rotation; 5-7 reps/side

Week 2 Day 3 - Persist PUMP COND 5x

A) Daily Focus Notes:
Goblet Rear Foot Elevated Split Squat
Putting your back foot up on a bench pushes most of the work onto your front leg. Holding the weight at your chest in the goblet position keeps your chest tall and drives the load into that front quad. Keep your front heel planted and lower with control. Pair it with the clamshell side plank hip thrust to target the sides of your hips.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min)

Week 2 Day 5 - Persist PUMP COND 5x

A) Daily Focus Notes:
Farmers Press
The farmers press is a strict overhead press performed one arm at a time, while your other hand holds a heavy weight low. That load held at your side forces your core to fight against tipping over, so you build shoulders and core strength at once. Press straight up and keep your ribs down. Follow it with the lean away lateral raise to finish the shoulders.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min)
2 min Cardio of Choice

1 1/4 Goblet Cyclist Squat
The 1 1/4 goblet cyclist squat adds a quarter rep at the bottom of each squat, and the raised heels

keep the work on your quads. Come all the way down, up a quarter, back down, then stand tall. That extra quarter piles up time in the hardest position without needing heavy weight. Pair it with the single leg RDL, where the hand support is only for balance, so your working leg still does all the lifting.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min)

Nutrition Myth: You have to eat perfectly clean to see results

The all or nothing mindset feels disciplined, but it usually backfires. You do great Monday through Friday, then the weekend hits and it all falls apart, and Monday you're starting over again. That cycle is exhausting and it's not sustainable. The people who actually get lasting results are the ones who can have a slice of pizza on a Friday night and just get back to their normal eating on Saturday morning, no guilt, no starting over. Flexibility isn't a lack of discipline, it's what makes consistency possible in real life. Perfect is the enemy of progress here.

Week 2 Day 1 - Persist PUMP COND 4x

A) Coach Notes:
Seated DB Press + Push Ups
This shoulder and chest giant set presses overhead first, then drops you into two push up variations back to back. Pressing first tires your shoulders out, so the push ups feel harder than usual even at just bodyweight. On the push ups you go from a wide deficit grip to a narrow grip, where the wide hands stretch the chest and the narrow hands shift the load to your triceps. Keep the rest short and push each move close to failure.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. Banded Shoulder External Rotation; 10-15 reps/side
2. PVC Alternating Shoulder Circles; 5-7 reps/side

C) Strength Intensity (15 min):
Low Incline DB Bench Press
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 15 reps @20X1 Tempo - RPE 7
Working Set 2 - 12 reps @20X1 Tempo - RPE 8
Working Set 3 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10-12 min):
3 sets
1. Seated DB Press; 10 reps @20X0 Tempo
rest 10-30 sec
2. Deficit Wide Push Up; 5-8 reps @20X0 Tempo
rest 10 sec
3. Narrow Push Up; 5-8 reps @20X0 Tempo
rest 90 sec and back to 1.
Loading Note:
Perform 1 warmup set to determine starting weight. Aim for each set to be close to form failure. If unable to complete 5 quality deficit push ups, perform with no deficit.

E) Isometric Fatigue Shoulders (12 min):
Every 4mins x 3 Sets
1min Ring Plank or Tall Plank
3 Wall Walks or 6 Inchworms
15 DB Reverse Curl 35/25# (Male/Female)
15 Plank Press Ups
Effort Note:
Isometrics are heavily underrated in most training programs. In this section the continuous movement keeps the heart rate high, and the isometrics build strength without sacrificing quality or your joints in the process. Aim for a consistent pace with about 60 sec rest between sets.

F) Cooldown (5 min):
1-2 sets
1. Sidelying 90/90 Thoracic Rotation; 5-7 reps/side
2. Childs Pose Reach Through; 30 sec/side
3. Cat Cow; 6-8 reps

Week 2 Day 2 - Persist PUMP COND 4x

A) Coach Notes:
Goblet Rear Foot Elevated Split Squat
Putting your back foot up on a bench pushes most of the work onto your front leg. Holding the weight at your chest in the goblet position keeps your chest tall and drives the load into that front quad. Keep your front heel planted and lower with control. Pair it with the clamshell side plank hip thrust to target the sides of your hips.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Shinbox Hip Extension + Switch; 5 reps/side
3. Half Kneeling Hamstring to Half Kneeling Hip Flexor Flow; 6-8 reps/side

rest 60 sec
2. Clamshell Side Plank Hip Thrust; 8-12 reps/side @21X1 Tempo
rest 90 sec and back to 1.
Loading Note:

Perform 1-2 warmup sets to determine starting weight. Aim for RPE 7-8 on the first working set, then keep the weight the same for the remainder of the sets, or increase the weight each set if looking to increase intensity.

A) Active Recovery Work (30 min):
Goal - complete 30 min of low-intensity steady-state movements today. You can get out for a 30 min walk today, go for a hike on some moderate terrain, or if you like to bike or swim, have at it.

B) PERSIST RECOVERY MOBILITY SESSION:

T Spine Can Opener x 1-2 min
Prayer Stretch x 1-2 min
Prone Swimmer x 5 with 5 sec hold in overhead position.

Week 2 Day 4 - Persist PUMP COND 4x

A) Coach Notes:
Pronated Pull Up + Ring Row
In this super set, the pronated pull up goes first at the harder grip position. After the short 15 second rest, move to the ring row, which shifts you into a more horizontal pulling angle, allowing you to continue accumulating reps after the vertical pull fatigues. The two angles hit the lats and the mid-back in one set, so you finish having trained the whole back through a full range.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. Diamond Plank; 30 sec
2. Banded YTW; 6-8 reps in each position
3. Forearm Plank to Dolphin Pose; 5-7 reps

C) Strength Intensity (10-12 min):

Set 3: 6 reps @20X0 Tempo - RPE 8
Set 4: 6 reps @20X0 Tempo - RPE 8

D) Strength Balance (12 min):

3 sets
1. Pronated Strict Pull Up or Lat Pulldown; 10 reps @21X1 Tempo
rest 15 sec
2. Ring Row or Body Row; Max Unbroken Reps @20X0 Tempo (aim for 6-15 reps)

That extra quarter piles up time in the hardest position without needing heavy weight. Pair it with the single leg RDL, where the hand support is only for balance, so your working leg still does all the lifting.

A) Daily Focus Notes:
Seated DB Press + Deficit Wide Push Up + Narrow Push Up
This is a superset for the shoulders and triceps. Press first with the seated dumbbell press, then drop straight into the two push up variations back to back. The wide deficit hands stretch the chest while the narrow hands shift the load onto the triceps, both feeling harder with the shoulders already fatigued. Keep the rest short and push each move close to failure.
Short on time? Remove Strength Balance or Upper Intervals based on your goals.

Week 2 Day 5 - Persist PERFORM

A) Daily Focus Notes:
Farmers Press + Lean Away DB Lateral Raise
This is a super set for the shoulders. The farmers press works one arm overhead at a time while the other holds a rack position, adding a strong core demand through the lateral shift. Move into the lean away lateral raise, leaning off the anchor to lengthen the arc on the side delt. Keep the raise

slow so it stays in the delt and does not turn into a shrug.
Short on time? Remove Strength Balance or Aerobic Push Pull based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice

Week 2 Day 6 - Persist PERFORM

A) Daily Focus Notes:
1 1/4 Goblet Cyclist Squat + Single Leg Hand Support DB RDL
This is a superset for the quads and hamstrings. The 1 1/4 goblet cyclist squat keeps the heels raised and adds a quarter rep to load the quads through the hardest range. Move into the single leg hand support dumbbell RDL to hit the hamstrings and glutes in the opposite pattern. Aim for RPE 8 to 9 across all sets.
Short on time? Remove Strength Balance or Power 30 based on your goals.

B) Warmup (8 min):

9 Box Jump Overs 30/24"
9 Russian KBS 70/53#
Effort Note: These Time Caps are intentionally challenging. Work hard to try and get your time under this number, but by no means get down if you don't. You will get a minimum of 3 minutes rest before part 2 regardless.
Part 2 — Beginning at 10 min on the clock, Every 5 min x 4 Sets:
10-16 Box Step Up
8-10 Hang Power Cleans 135/95#

Nutrition Myth: You have to eat perfectly clean to see results
The all or nothing mindset feels disciplined, but it usually backfires. You do great Monday through Friday, then the weekend hits and it all falls apart, and Monday you're starting over again. That cycle is exhausting and it's not sustainable. The people who actually get lasting results are the ones who can have a slice of pizza on a Friday night and just get back to their normal eating on Saturday morning, no guilt, no starting over. Flexibility isn't a lack of discipline, it's what makes consistency possible in real life. Perfect is the enemy of progress here.

Week 2 Day 1 - Persist MINIMALIST

A) Coach Notes:
Filly Press + Push Ups
This shoulder and chest giant set presses overhead first, then drops you into two push up variations back to back. Pressing first tires your shoulders out, so the push ups feel harder than usual even at just bodyweight. On the push ups you go from a wide deficit grip to a narrow grip, where the wide hands stretch the chest and the narrow hands shift the load to your triceps. Keep the rest short and push each move close to failure.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. Banded Shoulder External Rotation; 10-15 reps/side
1. PVC Alternating Shoulder Circles; 5-7 reps/side

C) Strength Intensity (15 min):
Low Incline DB Bench Press
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 15 reps @20X1 Tempo - RPE 7

Working Set 2 - 12 reps @20X1 Tempo - RPE 8
Working Set 3 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10-12 min):
3 sets
1. Filly Press; 8 reps/side @20X0 Tempo
rest 10-30 sec
2. Deficit Wide Push Up; 5-8 reps @20X0 Tempo
rest 10 sec
3. Narrow Push Up; 5-8 reps @20X0 Tempo
rest 90 sec and back to 1.
Loading Note: Perform 1 warmup set to determine starting weight. Aim for each set to be close to form failure. If unable to complete 5 quality deficit push ups, perform with no deficit.

E) Isometric Fatigue Shoulders (12 min):
Every 4mins x 3 Sets
1min Ring Plank or Tall Plank
3 Wall Walks or 6 Inchworms
15 DB Reverse Curl 35/25#
15 Plank Press Ups
Effort Note: Isometrics are heavily underrated in most training programs. In this section the continuous movement keeps the heart rate high, and the isometrics build strength without sacrificing quality or your joints in the process. Aim for a consistent pace with about 60 sec rest between sets.

F) Cooldown (5 min):
1-2 sets
1. Sidelying 90/90 Thoracic Rotation; 5-7 reps/side
1. Childs Pose Reach Through; 30 sec/side
1. Cat Cow; 6-8 reps

Tuesday, September 1st, 2026

Week 2 Day 2 - Persist MINIMALIST

A) Coach Notes:
Goblet Rear Foot Elevated Split Squat
Putting your back foot up on a bench pushes most of the work onto your front leg. Holding the weight at your chest in the goblet position keeps your chest tall and drives the load into that front

quad. Keep your front heel planted and lower with control. Pair it with the clamshell side plank hip thrust to target the sides of your hips.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Shinbox Hip Extension + Switch; 5 reps/side
1. Half Kneeling Hamstring to Half Kneeling Hip Flexor Flow; 6-8 reps/side

C) Strength Intensity (15 min):

Week 2 Day 3 - Persist MINIMALIST

A) Active Recovery Work (30 min):

T Spine Can Opener x 1-2 min
Prayer Stretch x 1-2 min
Prone Swimmer x 5 with 5 sec hold in overhead position.

Thursday, September 3rd, 2026

Week 2 Day 4 - Persist MINIMALIST

A) Coach Notes:
Farmers Press
The farmers press is a strict overhead press performed one arm at a time, while your other hand holds a heavy weight low. That load held at your side forces your core to fight against tipping over,

so you build shoulders and core strength at once. Press straight up and keep your ribs down. Follow it with the lean away lateral raise to finish the shoulders.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. Diamond Plank; 30 sec
1. Banded YTW; 6-8 reps in each position

C) Strength Intensity (12 min):
3 sets
1. Pronated Strict Pull Up; 10 reps @21X1 Tempo
rest 15 sec
2. DB Gorilla Row; 20 reps (R+L=2) @30X0 Tempo
rest 2 minutes
Loading Note: This is a mechanical drop set. Perform the pronated pull up or pulldown using assistance as necessary to match the reps and tempo prescribed.

D) Strength Balance (12 min):
3 sets
1. Farmers Press; 8 reps/side @21X1 Tempo
rest 30 sec
2. Lean Away DB Lateral Raise; 10 reps/side @20X0 Tempo
rest 90 sec and back to 1.
Loading Note: Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Aerobic Push Pull (12 min):

10 Left Arm DB Snatch High Pull 50/35# or 35/20#
Effort Note: Aim for a steady pace on all movements. Avoid hitting failure on the bodyweight and DB movements. Take short breaks as needed to keep rest minimal throughout.

F) Cooldown (5 min):

1-2 sets
1. Banded Single Arm Cross Body Stretch; 30 sec/side
1. Banded Single Arm Chest Stretch; 30 sec/side
1. Hands Clasped Behind Back Shoulder Stretch; 30 sec

Friday, September 4th, 2026

Week 2 Day 5 - Persist MINIMALIST

A) Coach Notes:
1 1/4 Goblet Cyclist Squat
The 1 1/4 goblet cyclist squat adds a quarter rep at the bottom of each squat, and the raised heels keep the work on your quads. Come all the way down, up a quarter, back down, then stand tall. That extra quarter piles up time in the hardest position without needing heavy weight. Pair it with the single leg RDL, where the hand support is only for balance, so your working leg still does all the lifting.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps
1. Lower Switch Cossack Squat; 6 reps/side

C) Strength Intensity (15 min):
Split Stance DB RDL
3 Working Sets; rest 2-3 min
Warm-Up Set - 6 reps/side @20X0 Tempo - Easy
Working Set 1 - 6 reps/side @20X0 Tempo - RPE 7
Working Set 2 - 6 reps/side @20X0 Tempo - RPE 8
Working Set 3 - 6 reps/side @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (12 min):
3 sets
1. 1 1/4 Goblet Cyclist Squat; 6-8 reps @30X0 Tempo
rest 60 sec
2. Single Leg Hand Support DB RDL; 6-8 reps/side @30X0 Tempo
rest 90 sec
Loading Note: Perform 1-2 warmup sets to determine starting weight. Aim for RPE 8-9 on all sets.

3 Sets @ high effort
8/side Single Arm Split Stance Dumbbell Swing
20 Switch Lunges (10/side)
30 Double Unders or 50 Single Unders
rest 90sec between sets
Effort Note: Aim to increase the pace on the Run each set. The movements are lower skill, allowing for higher effort output for each set.

F) Cooldown:
1-2 sets
1. Dynamic Adductor Stretch; 30 sec/side
1. Half Kneeling Weight Shift; 30 sec/side
1. Middle Split; 30 sec
