Week 3 Day 1 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Dumbbell Pullover + DB Bent Over Meadows Row
Two movements targeting the lat from different positions, back-to-back. The dumbbell pullover loads the lat at full shoulder flexion, in the long head stretch position. The Meadows row that follows drives the elbow back through a horizontal path with a slight rotational component. Together, they build lat thickness and length in the same session. Push close to failure on each set. Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. Band or Cable Straight Arm Lat Pulldown; 10-15 reps

Week 3 Day 2 - Persist PUMP LIFT 5x

A) Daily Focus Notes:

Two pressing movements that target the chest and shoulder from different angles back to back. The push up accumulates horizontal pressing volume through a full range of motion. Control the lowering rather than dropping the arms.. Do not rush it. Push close to failure on each set.
Short on time? Remove Strength Balance, or Finisher based on your goals.

Week 3 Day 5 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
1 1/4 DB Bench Press + DB Fly on Floor
Two chest movements back to back that combine the quarter rep technique with a fly variation. The 1 1/4 dumbbell bench press adds an extra quarter rep at the bottom. Lower fully, come up a quarter, return to the bottom, then press fully. This doubles the time spent at the most demanding point of the range. The DB fly on the floor limits the range of motion at the bottom, which removes shoulder stress while keeping the chest under load. Push close to failure on each set.
Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):

Set 6: 2 reps @21X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Loading Note:

Week 3 Day 6 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Hip Thrust March + Single Leg Hand Support DB RDL
Two glute and hamstring movements that work the posterior chain from different positions. The hip thrust march holds the top of a hip thrust while alternating knee lifts, which demands the glute to stabilize the pelvis through each single leg moment. The single leg hand support RDL that follows loads the hamstring and glute through a hinging pattern on one leg at a time. The hand support is there for balance, not to take the load off the working leg. Push close to RPE 8-9 on both movements in each set.
Short on time? Remove Strength Balance, or Finisher based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice

Week 3 Day 7 - Persist PUMP LIFT 5x

Recovery Myth: Soreness means it was a good workout

So many people equate being sore with having a good workout, and if they're not sore, they think they didn't do enough. I want to gently push back on that. Soreness is just one signal your body gives you, and it's influenced by a lot of things, how new a movement is, how much volume you did, even how much sleep you got the night before. You can have an incredible, productive session and wake up barely sore. You can also be wrecked sore from a mediocre workout that just hit your body in an unfamiliar way. Chase progress, not soreness. Track your strength, your reps, how you're feeling week to week. That tells you far more than how hard it is to sit down the next day.

Warmly,
Marcus

Week 3 Day 5 - Persist PUMP LIFT 4x

A) Daily Focus Notes:

Hip Thrust March + Single Leg Hand Support DB RDL

Two glute and hamstring movements that work the posterior chain from different positions. The hip thrust march holds the top of a hip thrust while alternating knee lifts, which demands the glute to stabilize the pelvis through each single leg moment. The single leg hand support RDL that follows loads the hamstring and glute through a hinging pattern on one leg at a time. The hand support is there for balance, not to take the load off the working leg. Push close to RPE 8-9 on both movements in each set.

Short on time? Remove Strength Balance, or Finisher based on your goals.

Week 3 Day 7 - Persist PUMP LIFT 4x

Recovery Myth: Soreness means it was a good workout

So many people equate being sore with having a good workout, and if they're not sore, they think they didn't do enough. I want to gently push back on that. Soreness is just one signal your body gives you, and it's influenced by a lot of things, how new a movement is, how much volume you did, even how much sleep you got the night before. You can have an incredible, productive session and wake up barely sore. You can also be wrecked sore from a mediocre workout that just hit your body in an unfamiliar way. Chase progress, not soreness. Track your strength, your reps, how you're feeling week to week. That tells you far more than how hard it is to sit down the next day.

Warmly,
Marcus

Week 3 Day 1 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Push Up + Internal Dumbbell Lateral Raise
Two pressing movements that hit the chest and shoulders from different angles, back to back. The push up accumulates horizontal pressing volume through a full range of motion. The internal dumbbell lateral raise that follows shifts the load onto the front and medial delts through a controlled arc. The 30X0 tempo on the raise means three seconds down. Control the lowering rather than dropping the arms. Push close to failure on each set.
Short on time? Remove Strength Balance, or Finisher based on your goals.

Week 3 Day 3 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Barbell Bent Over Row + Rear Delt Swings
Two pulling movements that build the mid back and rear delts back to back. The barbell bent over row loads the lats and mid back through a full range. Hinge at the hips, keep the spine neutral, and pull the bar toward the belly. The rear delt swings that follow are lighter and faster, targeting the rear delts and upper back that round out the pulling musculature. Keep the row strict and controlled, then let the swings flush the smaller muscles with blood. Work close to failure on each set.
Short on time? Remove Strength Balance, or Finisher based on your goals.

Week 3 Day 5 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Suitcase Russian Step Up + Bent Knee Copenhagen Raise
Two unilateral lower body movements that challenge the leg and hip from different positions. The suitcase Russian step up loads one side with the dumbbell held on the same side as the working leg, creating a lateral stability demand through the hip and glute. The bent knee Copenhagen raise that follows targets the adductor and inner thigh through an active raising pattern rather than a static hold. Push close to RPE 7-8 on both movements in each set.
Short on time? Remove Strength Balance, or Finisher based on your goals.

Pump Condition 5x

Monday, September 7th, 2026

Week 3 Day 1 - Persist PUMP COND 5x

A) Daily Focus Notes:
Hinge, Back & Bicep Conditioning
This piece keeps your hinge, back, and biceps working with your heart rate up. The short rests between moves are on purpose, so you keep each rep clean while still pushing the pace. Start light, around 26 to 35 pounds, and add weight each set only if your form holds. Think of it as your Strength Balance work with a higher heart rate.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets

1. Band or Cable Straight Arm Lat Pulldown; 10-15 reps
2. DB Seated Goodmorning; 10 reps

D) Strength Balance (12 min):
3 sets
1. Pronated Strict Pull Up or Lat Pulldown; 8 reps @21X1 Tempo

2. Supinated Strict Pull Up or Supinated Lat Pulldown; Max Unbroken Reps @20X0 Tempo @ same weight.
rest 2 minutes
Loading Note:
This is a mechanical drop set. Perform the pronated pull up or pull down using assistance as necessary to match the reps and tempo prescribed. Use the same amount of assistance/load for the Supinated Strict Pull Up/Pulldown and perform as many reps as possible.

E) Hinge, Back, Bicep (15 min):

rest 45-60sec between sets
*Begin with a light weight of around 26-35lb and increase with each set if you are feeling good.
Effort Note:
Short rests are intentionally included to allow for high quality on each movement. This is an extension of the Strength Balance section with a higher heart rate.

F) Cooldown (5 min):
1-2 sets

1. Couch Stretch; 30 sec/side
2. Half Kneeling Hamstring Stretch; 30 sec/side
3. Prayer Stretch; 30 sec

Tuesday, September 8th, 2026

Week 3 Day 2 - Persist PUMP COND 5x

A) Daily Focus Notes:
Isometric Fatigue Shoulders
This piece pairs holds with constant movement to build shoulder and grip strength without beating up your joints. The carries and waiter curls are the isometric part, where you hold a hard position while everything shakes and build strength in a way normal reps don't. Keep a steady pace and rest about 60 seconds between sets. Holding heavy under control is the whole point, so don't rush it. Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. 15 sec Cardio Sprint

2. Push Up; 10-25 reps @20X0 Tempo

Effort Note:
Isometrics are heavily underrated in most training programs. In this section, continuous movement keeps heart rate high, and isometrics build strength without sacrificing quality or your joints. Aim for a consistent pace with about 60 sec rest between sets.

F) Cooldown (5 min):
1-2 sets
1. Sidelying Thoracic Rotation Sweep; 5 reps/side

Week 3 Day 3 - Persist PUMP COND 5x

A) Daily Focus Notes:
Fatigued Abdominals
This one breaks a hard core workout into smaller chunks so you can keep moving. Each round drops in reps, so don't blow up on the first round; pace it from the start. The weighted L crunches load your abs directly, while the jump lunges and bike keep your legs and lungs busy. Steady effort across all four rounds beats going out too hot and stalling.
Short on time? Remove Strength Balance or Conditioning based on your goals.

Week 3 Day 5 - Persist PUMP COND 5x

A) Daily Focus Notes:
Aerobic Push Pull
This is a steady aerobic piece that mixes pushing, pulling, and cardio for twelve minutes straight. The goal is a smooth pace you can hold, not a max effort, so don't chase failure on the push ups or the snatches. Take short breaks when you need them so your rest stays minimal and you keep moving. Think steady engine, not sprint.
Short on time? Remove Strength Balance or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. 15 sec Cardio Sprint
2. Single Arm Plank; 10-20 sec/side
3. Prone Shoulder CARs; 5 SLOW reps
4. Thoracic Spine Can Opener; 30 sec

C) Strength Intensity (10-12 min):

Set 6: 2 reps @21X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Loading Note:
As reps go down, make your dips harder by adding weight or using less assistance. The goal of this session is to work on heavy/challenging dips. The first three sets should be lighter or easier than the last three sets.

D) Strength Balance (12 min):
3 sets
1. 1 1/4 Dumbbell Bench Press; 8 reps @20X0 Tempo
rest 30 sec
2. DB Fly on Floor; 10-15 reps @30X0 Tempo

Week 3 Day 6 - Persist PUMP COND 5x

A) Daily Focus Notes:
Interval Weight Training
This interval piece uses simple, low skill moves so you can pour in real effort each set. Aim to push the pace on the row a little harder every round. The kettlebell swings and box jumps are easy to repeat when tired, which is exactly why they let you work hard. Rest the full 90 seconds between sets so each round stays fast.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Goblet Heel Sits; 10 reps
2. DB Lateral Lunge; 6 reps/side

2-3 sets
1. Cyclist Front Squat; 7 reps @20X1 Tempo
rest 60 sec
2. Hamstring Walkout; 40-60 sec

16 Single Arm Alternating Russian KBS
10 Box Jump Overs 24/20" (Male/Female)
100-125m Row
rest 90sec between sets
Effort Note:
Aim to increase the pace on the row each set. The movements are lower skill, allowing for higher effort output per set.

Recovery Myth: Soreness means it was a good workout

So many people equate being sore with having a good workout, and if they're not sore, they think they didn't do enough. I want to gently push back on that. Soreness is just one signal your body gives you, and it's influenced by a lot of things, how new a movement is, how much volume you did, even how much sleep you got the night before. You can have an incredible, productive session and wake up barely sore. You can also be wrecked sore from a mediocre workout that just hit your body in an unfamiliar way. Chase progress, not soreness. Track your strength, your reps, how you're feeling week to week. That tells you far more than how hard it is to sit down the next day.

Warmly,
Marcus

Week 3 Day 1 - Persist PUMP COND 4x

A) Coach Notes:
Isometric Fatigue Shoulders
This piece pairs holds with constant movement to build shoulder and grip strength without beating up your joints. The carries and waiter curls are the isometric part, where you hold a hard position while everything shakes, building strength in a way normal reps don't. Keep a steady pace and rest about 60 seconds between sets. Holding heavy under control is the whole point, so don't rush it. Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. 15 sec Cardio Sprint
2. BW Side Plank Powell Raise; 10 reps/side
3. Slow Shoulder Circles; 5/side

C) Strength Intensity (15 min):
Bench Press
4 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 8 reps @20X1 Tempo - RPE 7
Working Set 2 - 6 reps @20X1 Tempo - RPE 8

Working Set 3 - 4 reps @20X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10-12 min):
3 sets
1. Seated Strict Press; 8 reps @20X0 Tempo
rest 30 sec
2. Push Up; 10-25 reps @20X0 Tempo
rest 90 sec and back to 1.
Loading Note:
Perform 1 warmup set to determine starting weight. Aim for each set to be close to form failure. The push up range is wide to accommodate different strength levels.

E) Isometric Fatigue Shoulders (12 min):
Every 4mins x 3 Sets
1min Dumbbell Rack Carry 50/35# (Male/Female)
10 Hand Release Burpee
15 Waiter Curls 50/35#
1 min Inchworms
Effort Note:
Isometrics are heavily underrated in most training programs. In this section the continuous movement keeps the heart rate high, and the isometrics build strength without sacrificing quality or your joints in the process. Aim for a consistent pace with about 60 sec rest between sets.

F) Cooldown (5 min):
1-2 sets
1. Sidelying Thoracic Rotation Sweep; 5 reps/side
2. Childs Pose Lat Stretch; 30 sec/side
3. Downdog to Updog; 5-7 reps

Week 3 Day 2 - Persist PUMP COND 4x

A) Coach Notes:
Fatigued Abdominals
This one breaks a hardcore workout into smaller chunks so you can keep moving. Each round drops in reps, so don't blow up on the first round; pace it from the start. The weighted L crunches load

your abs directly, while the jump lunges and bike keep your legs and lungs busy. Steady effort across all four rounds beats going out too hot and stalling.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Shinbox Heel Touch; 10 reps/side

Hinge, Back, Bicep
This is a three move circuit that hinges, pulls, and curls with short rests to keep your heart rate up. Start light with the weight. Recovery Myth: Soreness means it was a good workout

So many people equate being sore with having a good workout, and if they're not sore, they think they didn't do enough. I want to gently push back on that. Soreness is just one signal your body gives you, and it's influenced by a lot of things, how new a movement is, how much volume you did, even how much sleep you got the night before. You can have an incredible, productive session and wake up barely sore. You can also be wrecked sore from a mediocre workout that just hit your body in an unfamiliar way. Chase progress, not soreness. Track your strength, your reps, how you're feeling week to week. That tells you far more than how hard it is to sit down the next day.

Week 3 Day 1 - Persist PERFORM

A) Daily Focus Notes:
Run Mix Modal
This piece blends running with a loaded full body movement and hanging core work. The run keeps the heart rate up between rounds while the devils press and weighted hanging leg tuck build power and midline strength under fatigue. It runs as a 15-12-9-6-3 descending ladder with a 100m run between each round. Start controlled on the long opening rounds and let the shrinking reps carry you into a faster finish.
Short on time? Remove Strength Balance or Run Mix Modal based on your goals.

Week 3 Day 2 - Persist PERFORM

A) Daily Focus Notes:
Upper Intervals

This section pairs short pressing and pulling bursts with a row to build upper body work capacity. The goal is consistent output, so aim to hold the same effort on each set rather than fading. Short on time? Remove Strength Balance or Upper Intervals based on your goals.

Week 3 Day 3 - Persist PERFORM

A) Daily Focus Notes:
Lower Sprint
This section escalates effort across five short sprints paired with jump rope and core work. Each set climbs in intensity, from a moderate opener to maximal effort on the final rounds. This week cycles a bike sprint, double unders, and toes to bar every two and a half minutes. Attack the sprint, then keep moving through the rope and core so you are ready to escalate on the next set.

Week 3 Day 5 - Persist PERFORM

A) Daily Focus Notes:
Aerobic Push Pull
This section keeps you moving on a twelve minute clock, alternating pushing and pulling so no single area burns out. Settle into a steady pace and take short breaks to keep the rest minimal rather than chasing failure. This week pairs a bike with push up variations and a ring muscle up. The goal is smooth, continuous output for the full twelve minutes.
Short on time? Remove Strength Balance or Aerobic Push Pull based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets

Set 4: 5 reps @21X0 Tempo - RPE 9
Set 5: 3 reps @21X0 Tempo - RPE 9
Set 6: 2 reps @21X0 Tempo - RPE 9
Loading Note: As reps go down, make your dips harder by adding weight or using less assistance. The goal of this session is to work on heavy/challenging dips. The first three sets should be lighter or easier than the last three sets.

E) Strength Balance (12 min):
3 sets
1. 1 1/4 Dumbbell Bench Press; 8 reps @20X0 Tempo

Week 3 Day 6 - Persist PERFORM

A) Daily Focus Notes:
Power 30
This is the biggest conditioning piece of the week, built in two parts with a hard first effort and repeated intervals after. Part one is a short time capped sprint, so push the pace while keeping the loads unbroken where you can. Part two runs every five minutes, giving you built in rest to keep the quality high across all four sets. Pace the opening so you have output left for the back half.
Short on time? Remove Strength Balance or Power 30 based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice

3 Sets
1. Goblet Heel Sits; 10 reps
1. DB Lateral Lunge; 6 reps/side

15-12-10
Power Snatch 115/95# (Male/Female)
Burpee over Bar
*5 Box Jump Step Down after each round
Effort Note: These Time Caps are intentionally challenging. Work hard to try and get your time under this number, but by no means get down if you don't. You will get a minimum of 3 minutes rest before part 2 regardless. The barbell weight should allow you to perform all sets unbroken; adjust accordingly.
Part 2 — Beginning at 10 min on the clock, Every 5 min x 4 Sets:
200m Run
15-20 GHD Sit Up
10 Alternating Single Arm Devils Press 50/35#
12-20 Wall Balls (20/14, 10'/9')
*rest the remainder of the time before the next 5 min period
Effort Note: Try to keep your times between 2:30-3:30 for each set. If you are taking longer then drop the reps. The DB weight should allow you to perform the first set unbroken with the expectation of breaking up a little more each round; adjust accordingly.

F) Cooldown:
1-2 sets
1. Seal Stretch; 30 sec
1. Pancake Stretch; 30 sec
1. Butterfly Stretch; 60 sec

Week 3 Day 1 - Persist MINIMALIST

A) Coach Notes:
Isometric Fatigue Shoulders
This piece pairs holds with constant movement to build shoulder and grip strength without beating up your joints. The carries and waiter curls are the isometric part, where you hold a hard position while everything shakes, building strength in a way normal reps don't. Keep a steady pace and rest about 60 seconds between sets. Holding heavy under control is the whole point, so don't rush it. Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. 15 sec Cardio Sprint
1. BW Side Plank Powell Raise; 10 reps/side
1. Slow Shoulder Circles; 5/side

C) Strength Intensity (15 min):
DB Bench Press
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 12 reps @20X1 Tempo - RPE 7
Working Set 2 - 10 reps @20X1 Tempo - RPE 8
Working Set 3 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10-12 min):
3 sets
1. Seated DB Press; 8 reps @20X0 Tempo
rest 30 sec
2. Push Up; 10-25 reps @20X0 Tempo
rest 90 sec and back to 1.
Loading Note: Perform 1 warmup set to determine starting weight. Aim for each set to be close to form failure. The push up range is wide to accommodate different strength levels.

E) Isometric Fatigue Shoulders (12 min):
Every 4mins x 3 Sets
1min Dumbbell Rack Carry 50/35# (Male/Female)
10 Hand Release Burpee
15 Waiter Curls 50/35#
1 min Inchworms
Effort Note: Isometrics are heavily underrated in most training programs. In this section the continuous movement keeps the heart rate high, and the isometrics build strength without sacrificing quality or your joints in the process. Aim for a consistent pace with about 60 sec rest between sets.

F) Cooldown (5 min):
1-2 sets
1. Sidelying Thoracic Rotation Sweep; 5 reps/side

1. Childs Pose Lat Stretch; 30 sec/side
1. Downdog to Updog; 5-7 reps

Tuesday, September 8th, 2026

Week 3 Day 2 - Persist MINIMALIST

A) Coach Notes:
Fatigued Abdominals
This one breaks a hardcore workout into smaller chunks so you can keep moving. Each round drops in reps, so don't blow up on the first round; pace it from the start. The weighted L crunches load your abs directly, while the jump lunges and runs keep your legs and lungs busy. Steady effort across all four rounds beats going out too hot and stalling.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Shinbox Heel Touch; 10 reps/side
1. Half Kneeling Weight Shift; 10 reps/side

1. Suitcase Rear Foot Elevated Split Squat; 10 reps/side @20X0 Tempo
rest 60 sec
2. Bent Knee Copenhagen Raise; 6-12 reps/side @20X0 Tempo
rest 90 sec and back to 1.
Loading Note: Perform 1-2 warmup sets to determine starting weight. Aim for RPE 7-8 on the first working set, then keep the weight the same for the remainder of the sets, or increase the weight each set if looking to increase intensity.

E) Fatigued Abdominals (15 min):

Week 3 Day 4 - Persist MINIMALIST

A) Coach Notes:
Aerobic Push Pull
This is a steady aerobic piece that mixes pushing, pulling, and cardio for twelve minutes straight. The goal is a smooth pace you can hold, not a max effort, so don't chase failure on the push ups or the snatches. Take short breaks when you need them so your rest stays minimal and you keep moving. Think steady engine, not sprint.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
2-3 Sets
1. 15 sec Cardio Sprint
1. Single Arm Plank; 10-20 sec/side

Loading Note: This is a mechanical drop set. Perform the pronated pull up or pulldown using assistance as necessary to match the reps and tempo prescribed. Use the same amount of assistance/load for the Supinated Strict Pull Up/Pulldown and perform as many reps as possible.

D) Strength Balance (12 min):
3 sets

1. 1 1/4 Dumbbell Bench Press; 8 reps @20X0 Tempo
rest 30 sec
2. DB Fly on Floor; 10-15 reps @30X0 Tempo

Effort Note: Aim for a steady pace on all movements. Avoid hitting failure on the bodyweight and DB movements. Take short breaks as needed to keep rest minimal throughout.

F) Cooldown (5 min):
1-2 sets
1. Pole Rhomboid Stretch; 30 sec
1. PVC Box Shoulder Extension Stretch; 30 sec
1. Behind the Back Neck Stretch; 30 sec/side

Week 3 Day 5 - Persist MINIMALIST

A) Coach Notes:
Interval Weight Training
This interval piece uses simple, low skill moves so you can pour in real effort each set. Aim to push the pace on the row a little harder every round. The kettlebell swings and box jumps are easy to repeat when tired, which is exactly why they let you work hard. Rest the full 90 seconds between sets so each round stays fast.
Short on time? Remove Strength Balance, or Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Goblet Heel Sits; 10 reps

1. DB Lateral Lunge; 6 reps/side

C) Strength Intensity (15 min):

Working Set 1 - 8 reps @20X0 Tempo - RPE 7
Working Set 2 - 8 reps @20X0 Tempo - RPE 8
Working Set 3 - 8 reps @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (12 min):
2-3 sets
1. DB Front Rack Split Squat; 10 reps/side @20X0
rest 60 sec
2. Hamstring Walkout; 40-60 sec

Week 3 Day 7 - Persist MINIMALIST

Recovery Myth: Soreness means it was a good workout

So many people equate being sore with having a good workout, and if they're not sore, they think they didn't do enough. I want to gently push back on that. Soreness is just one signal your body gives you, and it's influenced by a lot of things, how new a movement is, how much volume you did, even how much sleep you got the night before. You can have an incredible, productive session and wake up barely sore. You can also be wrecked sore from a mediocre workout that just hit your body in an unfamiliar way. Chase progress, not soreness. Track your strength, your reps, how you're feeling week to week. That tells you far more than how hard it is to sit down the next day.

Warmly,
Marcus
