Pump Lift 5x

Monday, October 12th, 2026

Week 2 Day 1 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Zercher Drop Lunge
Holding the bar in your elbows forces your upper back and midline to work just to stay tall. The drop step takes your back leg behind and across, which loads the side of the hip more than a normal reverse lunge. Keep your chest up and let the front heel do the work.
Short on time? Remove Finisher

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps
1. Lower Switch Cossack Squat; 6 reps/side

C) Strength Intensity (15 min):
Back Squat
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 10 reps @20X1 Tempo - RPE 7
Working Set 2 - 8 reps @20X1 Tempo - RPE 8
Working Set 3 - 6 reps @20X1 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Intensity 2 (12-15 min):
Zercher Drop Lunge
3 Working Sets; rest 75-90 sec between all sides and sets
Warm-Up Set - 10 reps/side @20X0 Tempo - Easy

Tuesday, October 13th, 2026

Week 2 Day 2 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Glute Bridge Alternating DB Floor Press
Holding a bridge while you press one arm at a time forces your glutes and midline to stop you from twisting. The floor cuts the range short, which is easier on the shoulder and lets you push hard. Keep your hips locked high for the whole set.
Short on time? Remove Finisher

B) Warmup (8 min):

2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Tall Plank Knee to Elbow; 6 reps/side

Week 2 Day 3 - Persist PUMP LIFT 5x

A) Daily Focus Notes:

DB/KB Gorilla Row

Both bells stay on the floor between reps, so every row starts dead with no swing to help you. The hand on the floor props you up and keeps your hips square while the other side pulls. Row to your hip, not to your chest.

Short on time? Remove Finisher

B) Warmup (8 min):

2 min Cardio of Choice

3 Sets

1. DB Seated Goodmorning; 8-12 reps
1. KB Ballistic Row; 10 reps/side

Week 2 Day 5 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Landmine Hack Squat
The landmine holds the bar on a fixed path, so you can lean back into it and drive with the quads without fighting for balance. There are only two working sets here, so both should finish close to failure. Use the warm up sets to find your foot position, then keep it as the load climbs.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Single Leg Hip Bridge Hold; 30 sec/side
1. Alternating Single Arm Split Stance KB Swing; 6-10 reps/side

There are only two working sets here, so both should finish close to failure. Use the warm-up sets to lock in your foot position and depth, then hold that position as the load climbs.

Week 2 Day 6 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Half Kneeling DB/KB See Saw Press
One bell goes up while the other comes down, so there is always a load pulling you sideways. Half kneeling takes your legs out of it and makes your hips and midline hold you still. Squeeze the back glute and keep your ribs down.
Short on time? Remove Finisher

2 min Cardio of Choice
3 Sets
1. Bent Over Row Isometric; 15 sec

Week 2 Day 7 - Persist PUMP LIFT 5x

This week we're talking about recovery, and more specifically, how you're actually spending your rest days.

Rest days matter. But what you do on them matters more than most people realize.

If you're taking a full day off and still waking up Monday feeling beat up and unmotivated, the rest day isn't the problem. It's how you spent it. A day on the couch doomscrolling, poor sleep, and no sunlight isn't recovery. It's just a day you didn't train.

Real recovery is intentional. Get outside. Move a little, even just a walk. Eat well. Wind down at night. Use that time to set yourself up for the week ahead so you come back ready, not just rested. The people who take recovery seriously tend to perform better and stay in it longer. It's not a coincidence.

Warmly,
Marcus

Short on time? Remove Finisher

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps

Tuesday, October 13th, 2026

Week 2 Day 2 - Persist PUMP LIFT 4x

A) Daily Focus Notes:
DB/KB Gorilla Row
Both bells stay on the floor and you row one at a time, so the hand that is down works like a kickstand. That takes your lower back out of the job of holding you bent over, which means you can go heavier here than on a bent over row. Pull the bell toward your hip instead of your ribs and keep your shoulders square to the floor.
Short on time? Remove Finisher

2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Tall Plank Knee to Elbow; 6 reps/side

Week 2 Day 4 - Persist PUMP LIFT 4x

A) Daily Focus Notes:
Conventional Deadlift
The even weeks pull from the floor and the odd weeks use the Romanian, so you get both ends of the hinge across the block. Reps drop across the three sets, which is your cue to add weight each time rather than grinding out the same load. Reset your setup between every rep instead of bouncing, so the last set looks like the first one.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Single Leg Hip Bridge Hold; 30 sec/side

Working Set 3 - 8 reps/side @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

Conventional Deadlift

Week 2 Day 5 - Persist PUMP LIFT 4x

A) Daily Focus Notes:
Pronated Strict Pullup
The reps drop inside each wave, five then three then two, and the clock keeps moving whether you are ready or not. That is the point, you are training quality reps on tired arms rather than chasing one big set. Pick your assistance or added weight off the set of five, because if that one is a fight the rest of the block falls apart.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice

Week 2 Day 7 - Persist PUMP LIFT 4x

This week we're talking about recovery, and more specifically, how you're actually spending your rest days.

Rest days matter. But what you do on them matters more than most people realize.

If you're taking a full day off and still waking up Monday feeling beat up and unmotivated, the rest day isn't the problem. It's how you spent it. A day on the couch doomscrolling, poor sleep, and no sunlight isn't recovery. It's just a day you didn't train.

Real recovery is intentional. Get outside. Move a little, even just a walk. Eat well. Wind down at night. Use that time to set yourself up for the week ahead so you come back ready, not just rested. The people who take recovery seriously tend to perform better and stay in it longer. It's not a coincidence.

Warmly,
Marcus

Week 2 Day 1 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
DB/KB Gorilla Row
Both bells stay on the floor and you row one at a time, so the hand that is down works like a kickstand. That takes your lower back out of the job of holding you bent over, which means you can go heavier here than on a bent over row. Pull the bell toward your hip instead of your ribs and keep your shoulders square to the floor.

Week 2 Day 3 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Wide Grip Bench Press
Taking your hands out wider opens the shoulder more, so where you set your grip matters as much as what you load. Pick your spot on the bar this week and use the same one every wide grip week after, or your numbers across the block will not compare to each other. Pull your shoulder blades down and back before you unrack and hold them there, especially on the last set when position is the first thing to go.

Pump Condition 5x

Monday, October 12th, 2026

Week 2 Day 1 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Barbell Hip Thrust + Bent Knee Copenhagen Plank
The hip thrust loads your glutes hardest at the top, which is exactly where a squat starts to get easy. Squeeze at the top of every rep and keep your ribs down so your lower back does not take over. The Copenhagen then hits the inside of your thigh, the muscle that stops your knee caving in, and bending the top knee keeps the hold manageable while you learn it.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps
1. Lower Switch Cossack Squat; 6 reps/side

C) Strength Intensity 1 (15 min):
Back Squat
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 10 reps @20X1 Tempo - RPE 7
Working Set 2 - 8 reps @20X1 Tempo - RPE 8
Working Set 3 - 6 reps @20X1 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10 min):
3 sets
1. Barbell Hip Thrust; 12-15 reps @21X1 Tempo
rest 60 sec
2. Bent Knee Copenhagen Plank; 20-30 sec/side
rest 60-90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Aerobic Lower Body (15 min):

15 min EMOM
1st - Row 30-40 sec @ High Effort
2nd - 30-40 sec AMRAP Tall Kneel to Stand with Knee Lift
3rd - 30-40 sec AMRAP Single Arm Alternating Russian KB Swing (53/35) (Male/Female)
Effort Note:
The 20-30 seconds of rest at each minute will allow you to push the paces a bit higher than 15 minutes of continuous movement, but you will still have to pace appropriately to make it through all 15 minutes.

F) Cooldown (5 min):
1-2 sets
1. Foot Elevated Hip Flexion Stretch; 30 sec/side
1. Butterfly Stretch; 60 sec
1. Shinbox Switch; 5 reps/side

Tuesday, October 13th, 2026

Week 2 Day 2 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Bent Over Cable Chest Fly + Dumbbell Skullcrushers
The fly takes your triceps out of the movement and makes your chest do all the work on its own. Keep a soft bend in your elbows and think about hugging rather than pressing. The skullcrusher then does the reverse and leaves the triceps nowhere to hide, so pick a weight you can lower under control instead of one you have to throw.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint

Week 2 Day 3 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Pronated Strict Pullup
The clock matters more than the load here, and every set starts whether you are ready or not. Reps come down as you go so each set stays clean, which is the whole point of this format. Pick assistance that lets you finish the last set looking like the first, not one that has you scraping through.
Short on time? Remove Strength Balance or Increasing Effort based on your goals.

B) Warmup (8 min):

Week 2 Day 5 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Goblet Kickstand Squat + Goblet Cossack Squat
The kickstand sits halfway between a squat and a single leg squat, so the back foot is only there for balance and should carry almost nothing. Push through the front heel and keep your hips square to the front. The cossack then takes you sideways, a direction almost nothing else in this program trains, so go only as low as you can while keeping that heel down.
Short on time? Remove Strength Balance or Anaerobic Power Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Single Leg Hip Bridge Hold; 30 sec/side
1. Alternating Single Arm Split Stance Kettlebell Swing; 6-10 reps/side

C) Strength Intensity 1 (15 min):
Suitcase Short Step Walking Lunge
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps/side @20X0 Tempo - Easy
Working Set 1 - 12 reps/side @20X0 Tempo - RPE 7
Working Set 2 - 10 reps/side @20X0 Tempo - RPE 8
Working Set 3 - 8 reps/side @20X0 Tempo - RPE 9

RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10 min):
3 sets
1. Goblet Kickstand Squat; 10 reps (5/side alternating)
directly into
1. Goblet Cossack Squat; 10 reps (5/side alternating)
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Anaerobic Power Conditioning (15 min):
4-6 sets
Dumbbell Suitcase Squat Jump; 10 reps (35/20) (Male/Female)
rest 10 sec
Bike 16 sec @ 97% effort
rest walk 1:30-2:00
Effort Note:
The goal is maximal output, do NOT pace. The set range is meant to be adapted based on your physiology. If you are more powerful you will likely perform fewer sets (because the intensity of each set is higher). If you are more endurant, you may need more sets to achieve the desired stimulus (because the intensity of each set is lower).

F) Cooldown (5 min):
1-2 sets
1. Dynamic Adductor Stretch; 30 sec/side
1. Half Kneeling Weight Shift; 30 sec/side
1. Middle Split; 30 sec

Saturday, October 17th, 2026

Week 2 Day 6 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Yoga Pushup + Poliquin Lateral Raise
The yoga pushup starts in a pike, which stacks your shoulders under your hands and makes it a press as much as a pushup. Move through the middle of it slowly instead of throwing yourself forward. The lateral raise afterwards takes the side of your shoulder through a longer path than a normal raise, so go light and lower it slowly.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Dumbbell Bent Over Row Isometric; 15 sec
1. Half Kneeling Bottoms Up Kettlebell Press; 6-8 reps/side

C) Strength Intensity 1 (15 min):
Seated Behind the Neck Press
4 Working Sets; rest 2 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 8 reps @20X1 Tempo - RPE 7
Working Set 2 - 8 reps @20X1 Tempo - RPE 8
Working Set 3 - 8 reps @20X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Safety Note:
This exercise demands flexibility in the shoulders. If you have limited mobility, lower until the elbow is at 90 degrees and then press back up. You may use a wider grip than your normal strict press.

D) Strength Balance (10 min):
3 sets
1. Yoga Pushup; 6-10 reps
rest 30 sec
2. Poliquin Lateral Raise; 10-12 reps @30X0 Tempo
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Functional Pump Conditioning (15 min):
5 min AMRAP
30 Double Unders (use a weighted rope if you have one)
8 Dual Dumbbell Strict Press (35/20) (Male/Female)
8 Dual Dumbbell Hang Snatch (35/20)
20m Dual Dumbbell Overhead Carry (35/20)
45 sec Forearm Plank
rest 2 min; then repeat for a second 5 min AMRAP.
Effort Note:

The pace should be slightly higher than the 12 minutes of work last week, thus the 2 minutes of rest between AMRAPs. Aim for consistent pacing between the first and second AMRAP.

F) Cooldown (5 min):
1-2 sets
1. Banded Lat Stretch; 30-60 sec/side
1. Active Scratch Test; 5 reps/side
1. Wall Reverse Shoulder Circles; 10 reps/side

Week 2 Day 7 - Persist PUMP CONDITION 5x

This week we're talking about recovery, and more specifically, how you're actually spending your rest days.

Rest days matter. But what you do on them matters more than most people realize.

If you're taking a full day off and still waking up Monday feeling beat up and unmotivated, the rest day isn't the problem. It's how you spent it. A day on the couch doomscrolling, poor sleep, and no sunlight isn't recovery. It's just a day you didn't train.

Real recovery is intentional. Get outside. Move a little, even just a walk. Eat well. Wind down at night. Use that time to set yourself up for the week ahead so you come back ready, not just rested. The people who take recovery seriously tend to perform better and stay in it longer. It's not a coincidence.

Warmly,
Marcus

Week 2 Day 1 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Barbell Hip Thrust + Bent Knee Copenhagen Plank
The hip thrust loads your glutes hardest at the top, which is exactly where a squat starts to get easy. Squeeze at the top of every rep and keep your ribs down so your lower back does not take over. The Copenhagen then hits the inside of your thigh, the muscle that stops your knee caving in, and bending the top knee keeps the hold manageable while you learn it.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps
1. Lower Switch Cossack Squat; 6 reps/side

C) Strength Intensity (15 min):
Back Squat
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 10 reps @20X1 Tempo - RPE 7
Working Set 2 - 8 reps @20X1 Tempo - RPE 8
Working Set 3 - 6 reps @20X1 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (12 min):
3 sets
1. Barbell Hip Thrust; 12-15 reps @21X1 Tempo
rest 60 sec
2. Bent Knee Copenhagen Plank; 20-30 sec/side
rest 60-90 sec and back to 1.
Loading Note: Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Aerobic Lower Body (15 min):
15 min EMOM
1st - Row 30-40 sec @ High Effort
2nd - 30-40 sec AMRAP Tall Kneel to Stand with Knee Lift
3rd - 30-40 sec AMRAP Single Arm Alternating Russian KB Swing (53/35) (Male/Female)

Effort Note: The 20-30 seconds of rest at each minute will allow you to push the paces a bit higher than 15 minutes of continuous movement, but you will still have to pace appropriately to make it through all 15 minutes.

F) Cooldown (5 min):
1-2 sets
1. Foot Elevated Hip Flexion Stretch; 30 sec/side
1. Butterfly Stretch; 60 sec
1. Shinbox Switch; 5 reps/side

Tuesday, October 13th, 2026

Week 2 Day 2 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Bent Over Cable Chest Fly + Dumbbell Skullcrushers
The fly takes your triceps out of the movement and makes your chest do all the work on its own. Keep a soft bend in your elbows and think about hugging rather than pressing. The skullcrusher then does the reverse and leaves the triceps nowhere to hide, so pick a weight you can lower under control instead of one you have to throw.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Tall Plank Knee to Elbow; 6 reps/side

C) Strength Intensity (15 min):
Wide Grip Bench Press
4 Working Sets; rest 2 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 8 reps @20X1 Tempo - RPE 7
Working Set 2 - 8 reps @20X1 Tempo - RPE 8
Working Set 3 - 8 reps @20X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10 min):

3 sets
1. Bent Over Cable Chest Fly or Dumbbell Flat Bench Chest Fly; 10 reps @30X0 Tempo
rest 30 sec
2. Dumbbell Skullcrushers; 10 reps @30X0 Tempo
rest 90 sec and back to 1.
Loading Note: Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Press Core Conditioning (15 min):
For Time
8-10-12-14-12-10-8
GHD Sit Ups or Anchored Sit Ups
Glute Bridge Alternating Dumbbell Floor Press @30X0 Tempo (R+L=2)
*At the end of each round, complete 30 Double Unders or 50 Single Unders

Week 2 Day 5 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Pronated Strict Pullup
The clock matters more than the load here, and every set starts whether you are ready or not. Reps come down as you go so each set stays clean, which is the whole point of this format. Pick assistance that lets you finish the last set looking like the first, not one that has you scraping through.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Dumbbell Bent Over Row Isometric; 15 sec
1. Half Kneeling Bottoms Up Kettlebell Press; 6-8 reps/side

Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Safety Note: This exercise demands flexibility in the shoulders. If you have limited mobility, lower until the elbow is at 90 degrees and then press back up. You may use a wider grip than your normal strict press.

D) Strength Balance (8 min):
Pronated Strict Pullup

Week 2 Day 1 - Persist PUMP CONDITION 3x

A) Daily Focus Notes:
Glute Bridge Alternating Dumbbell Floor Press + Dumbbell Skullcrushers
Holding a glute bridge while you press one arm at a time means your hips and midline have to stop you twisting toward the working side. The floor also stops your elbow before it can travel too far back, so your shoulder stays in a safe spot and your triceps finish the press. The skullcrusher then

goes after those same triceps on their own, so keep your elbows still and let only your forearms move.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps
1. Lower Switch Cossack Squat; 6 reps/side

Week 2 Day 5 - Persist PUMP CONDITION 3x

A) Daily Focus Notes:
Seated Behind the Neck Press + Poliquin Lateral Raise
Sitting takes your legs out of it, so whatever goes up here is shoulder strength and nothing else. Behind the neck asks a lot of your shoulders, so lower the bar under control and go only as deep as

you can with your chest tall. The lateral raise then works the side of the shoulder on its own, so keep it light enough that your traps are not doing the lifting.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Dumbbell Seated Goodmorning; 8-12 reps
1. Half Kneeling Kettlebell Windmill; 5 reps/side

C) Strength Intensity 1 (12 min):
Conventional Deadlift
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @30X0 Tempo - Easy
Working Set 1 - 8 reps @30X0 Tempo - RPE 7
Working Set 2 - 6 reps @30X0 Tempo - RPE 8
Working Set 3 - 4 reps @30X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10 min):
3 sets
1. Seated Behind the Neck Press; 10 reps @21X1 Tempo
rest 30 sec
2. Poliquin Lateral Raise; 10-12 reps @30X0 Tempo
rest 90 sec and back to 1.
Loading Note: Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Aerobic Lower Body (15 min):
15 min EMOM
1st - Row 30-40 sec @ High Effort
2nd - 30-40 sec AMRAP Tall Kneel to Stand with Knee Lift
3rd - 30-40 sec AMRAP Single Arm Alternating Russian KB Swing (53/35)
Effort Note: The 20-30 seconds of rest at each minute will allow you to push the paces a bit higher than 15 minutes of continuous movement, but you will still have to pace appropriately to make it through all 15 minutes.

F) Cooldown (5 min):

Week 2 Day 7 - Persist PUMP CONDITION 3x

This week we're talking about recovery, and more specifically, how you're actually spending your rest days.

Rest days matter. But what you do on them matters more than most people realize.

If you're taking a full day off and still waking up Monday feeling beat up and unmotivated, the rest day isn't the problem. It's how you spent it. A day on the couch doomscrolling, poor sleep, and no sunlight isn't recovery. It's just a day you didn't train.

Real recovery is intentional. Get outside. Move a little, even just a walk. Eat well. Wind down at night. Use that time to set yourself up for the week ahead so you come back ready, not just rested. The people who take recovery seriously tend to perform better and stay in it longer. It's not a coincidence.

Warmly,
Marcus

Week 2 Day 1 - Persist PERFORM

A) Daily Focus Notes:
Barbell Hip Thrust + Bent Knee Copenhagen Plank
This is a super set for the glutes and inner thighs. Start with the barbell hip thrust at 21X1, two seconds down, a one second pause at the bottom, then drive the hips up and squeeze hard for a full second at the top. Move into the bent knee Copenhagen plank, supported from the top leg so the adductor of the down side has to hold you up. Push the hip thrust close to failure and hold the plank until the hip starts to drop.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps
1. Lower Switch Cossack Squat; 6 reps/side

Week 2 Day 2 - Persist PERFORM

A) Daily Focus Notes:
Chest Fly + Dumbbell Skullcrushers
This is a super set for the chest and triceps. Start with the fly at 30X0, three seconds lowering under control with no pause, opening the arms wide to stretch the chest rather than pressing. Move into the dumbbell skullcrushers on the same tempo, keeping the elbows pointed at the ceiling so the triceps stay loaded through the whole rep. Only thirty seconds of rest sits between them, so pick a weight you can take close to failure on both.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Tall Plank Knee to Elbow; 6 reps/side

Week 2 Day 3 - Persist PERFORM

A) Daily Focus Notes:
Pronated Strict Pullup
The pronated strict pullup runs as a density block rather than a super set this week. Six sets go every seventy five seconds with reps descending five, three, two and then repeating, so the rest shrinks relative to the effort as you go. Palms face away, and the 21X0 tempo means two seconds down with a one second hang at the bottom before the next rep. Add weight or take away assistance as the reps drop, and aim to improve on this every even week of the block.
Short on time? Remove Strength Balance or Power Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Dumbbell Seated Goodmorning; 8-12 reps
1. Kettlebell Ballistic Row; 10 reps/side

C) Speed Strength - Snatch (15-18 min):
Barbell Warm-up:
1-2 Sets (with Empty Barbell)
10 Snatch Grip Romanian Deadlift

10 Overhead Squat
10 sec Squatting Quad Snatch Grip Hold

Set 5: Challenging

D) Strength Intensity 1 (12 min):
Conventional Deadlift

3 Working Sets; rest 2-3 min

Working Set 1 - 8 reps @30X0 Tempo - RPE 7
Working Set 2 - 6 reps @30X0 Tempo - RPE 8
Working Set 3 - 4 reps @30X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

E) Strength Balance (8 min):
Pronated Strict Pullup
Every 75 sec x 6 sets
Set 1: 5 reps @21X0 Tempo - RPE 8
Set 2: 3 reps @21X0 Tempo - RPE 8
Set 3: 2 reps @21X0 Tempo - RPE 8
Set 4: 5 reps @21X0 Tempo - RPE 9
Set 5: 3 reps @21X0 Tempo - RPE 9
Set 6: 2 reps @21X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Loading Note:
The format will remain the same for all even weeks, aim to decrease assistance/increase weight or improve quality throughout this training block.

Week 2 Day 5 - Persist PERFORM

A) Daily Focus Notes:
Goblet Kickstand Squat + Goblet Cossack Squat
This is a super set for the legs and hips. The goblet kickstand squat keeps the back toe lightly down for balance so most of the work stays on the front leg without the demand of a full split squat. Move straight into the goblet cossack squat, shifting side to side to load one leg at a time through a deep lateral range. There is no rest between the two, so pick a bell you can hold in front for all twenty reps.
Short on time? Remove Strength Balance or Barbell Cycling based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Single Leg Hip Bridge Hold; 30 sec/side
1. Alternating Single Arm Split Stance Kettlebell Swing; 6-10 reps/side

C) Kettlebell and Plyometric HOT START (9 min):
Every 60 sec x 9 min
Minute 1) 5 Right Arm Kettlebell Clean + 5 Right Arm Kettlebell Push Jerk
Minute 2) 5 Left Arm Kettlebell Clean + 5 Left Arm Kettlebell Push Jerk
Minute 3) 5 Continuous Broad Jump

D) Strength Intensity 1 (15 min):
Suitcase Short Step Walking Lunge
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps/side @20X0 Tempo - Easy
Working Set 1 - 12 reps/side @20X0 Tempo - RPE 7
Working Set 2 - 10 reps/side @20X0 Tempo - RPE 8
Working Set 3 - 8 reps/side @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

E) Strength Balance (10 min):
3 sets

1. Goblet Kickstand Squat; 10 reps (5/side alternating)
directly into
1. Goblet Cossack Squat; 10 reps (5/side alternating)
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

F) Barbell Cycling (12 min):
3 sets @ High Effort
Row 15/12 Calories (Male/Female)
Power Snatch x 8 (95/65)
Overhead Squat x 4 (95/65)
rest 2 min between sets
Effort Note:
With each set increase your speed on the Row and attempt to cycle the barbell with greater efficiency and/or speed.

G) Cooldown (5 min):
1-2 sets
1. Dynamic Adductor Stretch; 30 sec/side
1. Half Kneeling Weight Shift; 30 sec/side
1. Middle Split; 30 sec

Saturday, October 17th, 2026

Week 2 Day 6 - Persist PERFORM

A) Daily Focus Notes:
Yoga Pushup + Poliquin Lateral Raise
This is a super set for the shoulders and chest. Start with the yoga pushup, dropping into a pushup then pushing the hips back and up into a downward dog before returning, which turns a pushup into a shoulder movement through a full range. Move into the Poliquin lateral raise, leaning away from an upright and raising the outside arm so the side delt works through a longer arc. Take both close to failure with thirty seconds between them.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Dumbbell Bent Over Row Isometric; 15 sec

1. Half Kneeling Bottoms Up Kettlebell Press; 6-8 reps/side

C) Upper HOT START (10 min):
4 Rounds - Increasing your row pace on each round
15-25 sec Supinated Pullup Isometric
6 Yoga Pushups
15/12 Calories Row (Male/Female)
Intention Note:
Start easy and gradually build up speed and intensity.

D) Strength Intensity 1 (15 min):
Seated Behind the Neck Press
4 Working Sets; rest 2 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 8 reps @20X1 Tempo - RPE 7
Working Set 2 - 8 reps @20X1 Tempo - RPE 8
Working Set 3 - 8 reps @20X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Safety Note:
This exercise demands flexibility in the shoulders. If you have limited mobility, lower until the elbow is at 90 degrees and then press back up. You may use a wider grip than your normal strict press.

E) Strength Balance (10 min):
3 sets
1. Yoga Pushup; 6-10 reps
rest 30 sec
2. Poliquin Lateral Raise; 10-12 reps @30X0 Tempo
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

F) Functional Pump Conditioning (12-15 min):
5 min AMRAP
30 Double Unders (use a weighted rope if you have one)
8 Dual Dumbbell Strict Press (35/20) (Male/Female)
8 Dual Dumbbell Hang Snatch (35/20)
20m Dual Dumbbell Overhead Carry (35/20)

45 sec Forearm Plank
rest 2 min; then repeat for a second 5 min AMRAP.
Effort Note:
The pace should be slightly higher than the 12 minutes of work last week, thus the 2 minutes of rest between AMRAPs. Aim for consistent pacing between the first and second AMRAP.

G) Cooldown (5 min):
1-2 sets
1. Banded Lat Stretch; 30-60 sec/side
1. Active Scratch Test; 5 reps/side
1. Wall Reverse Shoulder Circles; 10 reps/side

Week 2 Day 1 - Persist MINIMALIST

A) Daily Focus Notes:
Dumbbell Single Leg Hip Thrust + Bent Knee Copenhagen Plank
The single leg hip thrust asks one glute to do the whole job, so you need far less weight than a two leg version to get the same effect. Keep your hips level, because the side you are not working will try to drop as you fatigue. The Copenhagen plank then loads the inner thigh from the top leg, a spot that almost never gets trained directly. Take the hip thrust close to failure and hold the plank until your hip starts to sag.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Banded Reverse Nordics; 6-8 reps
1. Lower Switch Cossack Squat; 6 reps/side

C) Strength Intensity (12 min):
Dual Dumbbell Front Squat
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 10 reps @20X1 Tempo - RPE 7
Working Set 2 - 8 reps @20X1 Tempo - RPE 8

RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (12 min):
3 sets
1. Dumbbell Single Leg Hip Thrust; 10 reps/side @21X1 Tempo
rest 60 sec
2. Bent Knee Copenhagen Plank; 20-30 sec/side

Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

2nd - 30-40 sec AMRAP Tall Kneel to Stand with Knee Lift
3rd - 30-40 sec AMRAP Single Arm Alternating Dumbbell Clean
Effort Note:
The 20-30 seconds of rest at each minute will allow you to push the paces a bit higher than 15 minutes of continuous movement, but you will still have to pace appropriately to make it through all 15 minutes.

F) Cooldown (5 min):
1-2 sets
1. Foot Elevated Hip Flexion Stretch; 30 sec/side
1. Butterfly Stretch; 60 sec
1. Shinbox Switch; 5 reps/side

Tuesday, October 13th, 2026

Week 2 Day 2 - Persist MINIMALIST

A) Daily Focus Notes:
Dumbbell Flat Bench Chest Fly + Narrow Grip Tricep Pushup
The fly is the only movement in your week that stretches the chest under load instead of pressing through it. Three seconds down with the arms wide, and stop where you feel the stretch rather than chasing depth. The narrow grip push up then finishes the triceps with your bodyweight, and thirty seconds is all the rest you get between them. Pick a fly weight you can still control on the third set. Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint

Middle Split x 1-2 min
Squat Hold x 1-2 min
Slow Bodyweight Squat x 5 reps

Thursday, October 15th, 2026

Week 2 Day 4 - Persist MINIMALIST

A) Daily Focus Notes:
Goblet Kickstand Squat + Goblet Cossack Squat
The kickstand sits halfway between a squat and a single leg squat, so the back foot is only there for balance and should carry almost nothing. Push through the front heel and keep your hips square to the front. The cossack then takes you sideways, a direction almost nothing else in this program trains, so go only as low as you can while keeping that heel down.
Short on time? Remove Strength Balance or Anaerobic Power Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Single Leg Hip Bridge Hold; 30 sec/side
1. Alternating Single Arm Split Stance Kettlebell Swing; 6-10 reps/side

C) Strength Intensity (12 min):
Single Leg Hand Support Dumbbell RDL
3 Working Sets; rest 2-3 min
Warm-Up Set - 8 reps/side @30X0 Tempo - Easy
Working Set 1 - 8 reps/side @30X0 Tempo - RPE 7
Working Set 2 - 7 reps/side @30X0 Tempo - RPE 8
Working Set 3 - 6 reps/side @30X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (12 min):
3 sets

1. Goblet Kickstand Squat; 10 reps (5/side alternating)
directly into
1. Goblet Cossack Squat; 10 reps (5/side alternating)
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Anaerobic Power Conditioning (15 min):
5 sets
10 Dumbbell Suitcase Squat Jump (35/20) (Male/Female)
5 Devils Press
5 Burpee Tuck Jump
rest walk 90 sec
Effort Note:
The goal is maximal output, do NOT pace. All 5 sets should be at the same maximal effort, so take the full rest walk between them.

F) Cooldown (5 min):
1-2 sets
1. Dynamic Adductor Stretch; 30 sec/side
1. Half Kneeling Weight Shift; 30 sec/side
1. Middle Split; 30 sec

Friday, October 16th, 2026

Week 2 Day 5 - Persist MINIMALIST

A) Daily Focus Notes:
Yoga Push Up + Poliquin Lateral Raise
The yoga pushup starts in a pike, which stacks your shoulders under your hands and makes it a press as much as a pushup. Move through the middle of it slowly instead of throwing yourself forward. The lateral raise afterwards takes the side of your shoulder through a longer path than a normal raise, so go light and lower it slowly.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Dumbbell Bent Over Row Isometric; 15 sec
1. Half Kneeling Bottoms Up Kettlebell Press; 6-8 reps/side

C) Strength Intensity (8 min):

Week 2 Day 7 - Persist MINIMALIST

This week we're talking about recovery, and more specifically, how you're actually spending your rest days.

Rest days matter. But what you do on them matters more than most people realize.

If you're taking a full day off and still waking up Monday feeling beat up and unmotivated, the rest day isn't the problem. It's how you spent it. A day on the couch doomscrolling, poor sleep, and no sunlight isn't recovery. It's just a day you didn't train.

Real recovery is intentional. Get outside. Move a little, even just a walk. Eat well. Wind down at night. Use that time to set yourself up for the week ahead so you come back ready, not just rested. The people who take recovery seriously tend to perform better and stay in it longer. It's not a coincidence.

Warmly,
Marcus
