Monday, October 19th, 2026

Week 3 Day 1 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Nordic Hamstring Curl + Russian KB Swing
These two hit the hamstrings from opposite ends. The Nordic loads them while they lengthen and asks you to fight the lowering, while the swing trains them to snap the hips shut fast. Lower as slow as you can on the curl, and if you cannot control it, use more assistance.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Goblet Heel Sits; 10 reps

Week 3 Day 2 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Incline DB Chest Fly + Barbell Skullcrushers
This super set hits the chest and triceps back to back with almost no rest between them. Both moves are slow on the way down, so pick a weight you can control rather than one you have to throw. Keep a soft bend in the elbows on the fly and let the chest do the pulling.

Short on time? Remove Finisher

3 Rounds
1. 90 sec Cardio of Choice

Week 3 Day 3 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Supinated Strict Pullup
This is a density piece, so the clock matters more than the load. Pick assistance that leaves you fresh enough to finish every set at the same quality, not one that has you scraping through the last few. The underhand grip brings the biceps in and usually lets you hold a better position than a wide grip.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. DB Zercher Goodmorning; 8-12 reps
1. KB Gorilla Row; 6-8 reps/side

C) Strength Intensity (12 min):
Romanian Deadlift
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @30X0 Tempo - Easy
Working Set 1 - 7 reps @30X0 Tempo - RPE 7
Working Set 2 - 7 reps @30X0 Tempo - RPE 8

D) Strength Intensity 2 (15 min):
Wide Grip Bent Over Barbell Row

RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

E) Strength Balance (8 min):
Supinated Strict Pullup
Every 75 sec x 6 sets
Set 1: 6 reps @20X0 Tempo - RPE 7

Set 4: 6 reps @20X0 Tempo - RPE 8
Set 5: 6 reps @20X0 Tempo - RPE 9
Set 6: 6 reps @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Loading Note:
This is a high density format. Select assistance consistent with about a 12 rep max pullup. The format will remain the same for all odd weeks, aim to decrease assistance or improve quality throughout this training block.

F) Finisher (10 min):
2-3 sets
1. Cable Straight Arm Lat Pulldown or DB Pullover; 10-12 reps @30X0 Tempo
rest 30 sec

Friday, October 23rd, 2026

Week 3 Day 5 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Single Arm DB Rack Tall Kneel to Stand + Curtsy Squat
Loading one side only makes your midline fight to keep you square, and these two run back to back with no rest between them. Stand up without pushing off your hands, and on the curtsy let the back leg cross behind rather than dropping straight down. Keep the weight tight in the rack the whole time.
Short on time? Remove Finisher

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Alternating Landmine Rotational Deadlift; 6 reps/side
1. Landmine Zercher Forward Lunge; 6-10 reps/side

C) Strength Intensity 1 (12 min):

Working Set 2 - 8 reps/side @20X0 Tempo - RPE 8

Working Set 3 - 10-15 reps @30X0 Tempo - RPE 10
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Effort Note:
You may adjust the tempo even more if needing to make this more challenging.

E) Strength Balance (10 min):

3 sets
1. Alternating Single Arm Dumbbell Rack Tall Kneel to Stand; 10 reps (5/side, switch the rack arm at halfway)

rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

F) Finisher (10 min):
2-3 sets; rest as needed
10-20 Frog Crunch
10-20 Straight Leg Sit Up
10-20 Windshield Wipers (5-10/side)
Effort Note:
Try to challenge yourself by keeping the rest minimum. If you are unsure start with 30-60 seconds rest between all movements and sets.

1-2 sets
1. Seal Stretch; 30 sec
1. Pancake Stretch; 30 sec
1. Horse Stance Pulse; 30 sec

Saturday, October 24th, 2026

Week 3 Day 6 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Pike Strict HSPU + Front and Lateral Raise
The pike position stacks your shoulders under your hands, so this presses close to straight overhead. Take the hold instead of the reps if you cannot keep your elbows tracking forward. The raises then finish the front and side of the shoulder with light weight and slow lowering.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint

Week 3 Day 7 - Persist PUMP LIFT 5x

This week I want to talk about nutrition. Not what to eat, but how to think about it.

This one is simple but it's worth saying plainly. You can't out-train inconsistent nutrition.

It's not about eating less. It's not about being perfect during the week and loosening up on weekends. It's about eating enough to support your goals, consistently, in a way you can actually sustain. If your approach works Monday through Thursday and falls apart every Friday, that pattern is going to show up in your results.

Find something that fits your life. It doesn't have to be perfect. It has to be repeatable. The diet that works is the one you can actually stick to, not the one that looks best on paper.

Warmly,
Marcus

Week 3 Day 2 - Persist PUMP LIFT 4x

A) Daily Focus Notes:

Incline Dumbbell Bench Press + Barbell Skullcrushers

These two run back to back with barely any rest, and both are slow on the way down. The incline press hits the chest and front of the shoulder, then the skullcrusher finishes the triceps that just helped you press. Pick loads you can lower under control for three full seconds, because the tempo is doing the work here, not the weight on the bar.

Week 3 Day 5 - Persist PUMP LIFT 4x

A) Daily Focus Notes:
Pike Strict HSPU + Front and Lateral Raise

The pike position stacks your shoulders under your hands, so this presses close to straight overhead. Take the hold instead of the reps if you cannot keep your elbows tracking forward. The raises then finish the front and side of the shoulder with light weight and slow lowering.
Short on time? Remove Finisher

B) Warmup (8 min):

Week 3 Day 7 - Persist PUMP LIFT 4x

This week I want to talk about nutrition. Not what to eat, but how to think about it.

This one is simple but it's worth saying plainly. You can't out-train inconsistent nutrition.

It's not about eating less. It's not about being perfect during the week and loosening up on weekends. It's about eating enough to support your goals, consistently, in a way you can actually sustain. If your approach works Monday through Thursday and falls apart every Friday, that pattern is going to show up in your results.

Find something that fits your life. It doesn't have to be perfect. It has to be repeatable. The diet that works is the one you can actually stick to, not the one that looks best on paper.

Warmly,

Week 3 Day 1 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Incline Dumbbell Bench Press + Barbell Skullcrushers
These two run back to back with barely any rest, and both are slow on the way down. The incline press hits the chest and front of the shoulder, then the skullcrusher finishes the triceps that just helped you press. Pick loads you can lower under control for three full seconds, because the tempo is doing the work here, not the weight on the bar.
Short on time? Remove Finisher

B) Warmup (8 min):

Week 3 Day 5 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Suitcase Rear Foot Elevated Split Squat + Russian KB Swing
These two ask opposite things from the same hip. The split squat is slow and balanced on one leg, then the swing is fast and on two, so the second movement gives you somewhere to keep working once your balance is spent. On the swing let the bell float up on its own instead of lifting it with your arms, and on the split squat keep the back foot along for the ride rather than pushing off it.
Short on time? Remove Finisher

Week 3 Day 1 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Aerobic Lower Body
This one runs straight through with no rest, so the bike is where you set your pace and the lunges are where you hold it. The three speeds are there to teach you what easy, moderate and hard actually feel like, so be honest on each one. Break the lunges up if you need to, because keeping the quality high matters more than going unbroken.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Goblet Heel Sits; 10 reps

1. Dynamic Couch Stretch; 30 sec/side

Week 3 Day 2 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Press Core Conditioning
The rep ladder drops to its smallest round in the middle, then climbs back up, so the second half is where this gets decided. Pick a bench weight you can still put together on the way back up, not one that only works while you are fresh. The burpees at the end of each round are there to keep your breathing high, so move through them steadily instead of sprinting.

Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):

Week 3 Day 3 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Increasing Effort
The rests inside the round are short on purpose, so you are still breathing hard when you get to the next move. The bike is the only place the pace should change, and it should be quicker on every round. Pick a row weight that makes the sets hard on their own, because the short rest will take care of the rest.
Short on time? Remove Strength Balance or Increasing Effort based on your goals.

B) Warmup (8 min):

Week 3 Day 5 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Anaerobic Power Conditioning
This is the one piece in the week where you are meant to go all out and save nothing. The rest looks long because the work is short, so use all of it and start every set fresh. The set range is there because bodies differ, so if you are powerful you will need fewer sets and if you are built for endurance you will need more.
Short on time? Remove Strength Balance or Anaerobic Power Conditioning based on your goals.

B) Warmup (8 min):

1. 90 sec Cardio of Choice

Week 3 Day 7 - Persist PUMP CONDITION 5x

This week I want to talk about nutrition. Not what to eat, but how to think about it.

This one is simple but it's worth saying plainly. You can't out-train inconsistent nutrition.

It's not about eating less. It's not about being perfect during the week and loosening up on weekends. It's about eating enough to support your goals, consistently, in a way you can actually sustain. If your approach works Monday through Thursday and falls apart every Friday, that pattern is going to show up in your results.

Find something that fits your life. It doesn't have to be perfect. It has to be repeatable. The diet that works is the one you can actually stick to, not the one that looks best on paper.

Warmly,

Week 3 Day 1 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Aerobic Lower Body
This one runs straight through with no rest, so the bike is where you set your pace and the lunges are where you hold it. The three speeds are there to teach you what easy, moderate and hard actually feel like, so be honest on each one. Break the lunges up if you need to, because keeping the quality high matters more than going unbroken.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Goblet Heel Sits; 10 reps
1. Dumbbell Lateral Lunge; 6 reps/side

Week 3 Day 2 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Press Core Conditioning
The rep ladder drops to its smallest round in the middle, then climbs back up, so the second half is where this gets decided. Pick a bench weight you can still put together on the way back up, not one that only works while you are fresh. The burpees at the end of each round are there to keep your breathing high, so move through them steadily instead of sprinting.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice

Week 3 Day 4 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Anaerobic Power Conditioning
This is the one piece in the week where you are meant to go all out and save nothing. The rest looks long because the work is short, so use all of it and start every set fresh. The set range is there because bodies differ, so if you are powerful you will need fewer sets and if you are built for endurance you will need more.
Short on time? Remove Strength Balance or Anaerobic Power Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Alternating Landmine Rotational Deadlift; 6 reps/side

Week 3 Day 5 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Functional Pump Conditioning
The rest between sets is there so you can run harder than you would in a piece that runs straight through. The carry lands right after the press, so your shoulder is already tired when you have to hold the bell still, and that is the point of the order. Keep your ribs down on the carry and the plank, because that is the first thing to go when you get tired.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

Week 3 Day 3 - Persist PUMP CONDITION 3x

A) Daily Focus Notes:
Increasing Effort
The name tells you the job: the bike gets faster every round, and the long rest at the end is what pays for it. The short rests inside the round are only there to let you change stations, so do not treat them as a break. That means the row and the cleans have to be paced so you still have something left for the bike, because that is the only part of this piece meant to climb.
Short on time? Remove Strength Balance or Increasing Effort based on your goals.

Week 3 Day 1 - Persist PERFORM

A) Daily Focus Notes:
Aerobic Lower Body
This piece runs for fifteen minutes without stopping, cycling a three speed bike ramp into loaded lunges and hanging core work. The bike builds from easy to moderate to hard across ninety seconds, then you step off into the suitcase reverse lunge and the toes to bar. Break the lunges and the core work up as much as you need to keep the quality high. The pace should be one you can hold for the full fifteen minutes, so make sure you can still ride well on the last round.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Goblet Heel Sits; 10 reps
1. Dumbbell Lateral Lunge; 6 reps/side

10 Romanian Deadlift
10 Strict Press
10 Front Squat

10 sec Front Rack Hold
10 sec Front Squat Hold
Every 2:00-3:00 x 5 sets

2 Hang Clean
rest until next 2:00

Week 3 Day 2 - Persist PERFORM

A) Daily Focus Notes:
Press Core Conditioning
This piece pairs a pressing movement with hanging core work and adds burpees at the end of every round. The ladder drops to its smallest round in the middle at twelve, eight, four, then climbs back out, so the hardest rounds sit at both ends. Pick a bench weight you could hit for fifteen reps at RPE 8 to 9, because it has to survive all five rounds. Hold a steady pace rather than sprinting the opening round, and there is a fifteen minute cap.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
1. Tall Plank Shoulder Taps; 30-45 sec

Week 3 Day 3 - Persist PERFORM

A) Daily Focus Notes:
Power Conditioning
This section escalates effort across five short sets, from a moderate opener to maximal on the last three. This week opens each set with a twenty second bike sprint, then eight devils press and eight box jump overs before you rest out the remainder of the two and a half minutes. Attack the sprint first while you are fresh, then keep moving so you buy back as much rest as you can. Set 1 is moderate, Set 2 is hard, and Sets 3 to 5 are all out.
Short on time? Remove Strength Balance or Power Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice

A) Active Recovery Work (30-40 min):
Goal: Complete 30 minutes of low-intensity steady-state movement today. Go for a jog, hike, walk, ruck, bike, or swim. If you want a GYM OPTION, please use the following. You should keep your heart rate in the Zone 2 range. That can be calculated roughly as 65-75% of your theoretical maximal HR (220-age).

Week 3 Day 5 - Persist PERFORM

A) Daily Focus Notes:
Barbell Cycling
This section trains barbell speed and efficiency once you are already breathing hard. The bike comes first to drive the heart rate up, then you cycle six hang squat snatches without putting the bar down if you can. Three sets with two full minutes of rest means every set should be fast rather than survived. Push the bike a little harder on each set and try to move the bar better each time, not only quicker.
Short on time? Remove Strength Balance or Barbell Cycling based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice

1. Alternating Landmine Rotational Deadlift; 6 reps/side
1. Landmine Zercher Forward Lunge; 6-10 reps/side

Week 3 Day 6 - Persist PERFORM

A) Daily Focus Notes:
Functional Pump Conditioning
This piece keeps a single kettlebell overhead through most of the round, so the shoulder works while the legs and lungs do too. The run comes first, then the push press, then the carry lands right after it with the arm already tired, and the ring plank closes the round. Ninety seconds of rest between sets means each round should be run at a real pace rather than paced out. Keep the ribs down on the carry so the load stays over the shoulder and not out in front.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Prone Half Angels; 6-8 reps
1. Bulgarian Ring Row; 6-8 reps

Start easy and gradually build up speed and intensity. The pullups are broken up to keep quality high, focus on a fast pullup with a controlled lower.

D) Strength Intensity 1 (15 min):

1. Supinated Passive Hang; 30 sec
1. PVC Shoulder Extension Stretch; 30-60 sec

Week 3 Day 7 - Persist PERFORM

This week I want to talk about nutrition. Not what to eat, but how to think about it.

This one is simple but it's worth saying plainly. You can't out-train inconsistent nutrition.

It's not about eating less. It's not about being perfect during the week and loosening up on weekends. It's about eating enough to support your goals, consistently, in a way you can actually sustain. If your approach works Monday through Thursday and falls apart every Friday, that pattern is going to show up in your results.

Find something that fits your life. It doesn't have to be perfect. It has to be repeatable. The diet that works is the one you can actually stick to, not the one that looks best on paper.

Warmly,
Marcus

Week 3 Day 1 - Persist MINIMALIST

A) Daily Focus Notes:
Aerobic Lower Body
This runs for fifteen minutes without stopping, so the pace is the whole point. The 200m run sets your speed for the round, and if you come back from it breathing hard you went too fast. Break the loaded lunges up as much as you need to keep every step controlled. You should be able to run the last round as well as the first.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Goblet Heel Sits; 10 reps
1. Dumbbell Lateral Lunge; 6 reps/side

1. Dynamic Couch Stretch; 30 sec/side
1. Hip Sleeper Stretch; 30 sec/side

Week 3 Day 2 - Persist MINIMALIST

A) Daily Focus Notes:
Press Core Conditioning
The rep ladder drops to its smallest round in the middle, then climbs back up, so the second half is where this gets decided. Pick a bench weight you can still put together on the way back up, not one that only works while you are fresh. The burpees at the end of each round are there to keep your breathing high, so move through them steadily instead of sprinting.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):

3 Rounds
1. 90 sec Cardio of Choice
1. Tall Plank Shoulder Taps; 30-45 sec

Week 3 Day 4 - Persist MINIMALIST

A) Daily Focus Notes:
Anaerobic Power Conditioning
This is the one piece in your week where you are not pacing. Five short sets at maximal effort, then ninety seconds of walking to recover before the next one. If you are still moving well on the last set you probably held back, and if you cannot finish the third you went out too hard.
Short on time? Remove Strength Balance or Anaerobic Power Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Alternating Narrow Stance Kettlebell Rotational Deadlift; 6 reps/side
3. Alternating KB Goblet Forward Lunge; 6-10 reps/side

5 sets
15 Goblet Squat @10X0 Tempo
10 Single Arm Alternating Devils Press (5/side)
10 Jump Lunge (5/side)
rest walk 90 sec
Effort Note:
The goal is maximal output, do NOT pace. All 5 sets should be at the same maximal effort, so take the full rest walk between them.

F) Cooldown (5 min):
1-2 sets
1. Seal Stretch; 30 sec
1. Pancake Stretch; 30 sec
1. Horse Stance Pulse; 30 sec

Friday, October 23rd, 2026

Week 3 Day 5 - Persist MINIMALIST

A) Daily Focus Notes:
Functional Pump Conditioning
The rest between sets is there so you can run harder than you would in a piece that runs straight through. The carry lands right after the press, so your shoulder is already tired when you have to hold the bell still, and that is the point of the order. Keep your ribs down on the carry and the plank, because that is the first thing to go when you get tired.

Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
1. Prone Half Angels; 6-8 reps
