Week 5 Day 1 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Back Rack Reverse Lunge
Reps are at their lowest this week, so this should be your heaviest lunge work of the block. Stepping back instead of forward keeps the front shin quieter and takes stress off the knee. Aim to beat what you did in Week 1 on every set.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint

Week 5 Day 2 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Incline Dumbbell Bench Press
Reps are at their lowest of the block this week, so this is your heaviest incline pressing. Dumbbells let each arm find its own path, which is kinder to the shoulder than a bar. Finish with the max set at your first working weight and try to beat Week 1.

Short on time? Remove Finisher

Week 5 Day 3 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Wide Grip Bent Over Barbell Row
Reps drop across the sets this week, so the weight should climb each time. A wide grip pulls your elbows out away from your body and puts more work on the upper back and rear shoulders. Keep your torso at the same angle on the last set as the first.
Short on time? Remove Finisher

3 Rounds
1. 90 sec Cardio of Choice
2. DB Seated Goodmorning; 8-12 reps

Week 5 Day 5 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Landmine KOT Squat
Reps are the highest of the block this week, so this is your biggest quad set of the cycle. Letting the knees travel past the toes is the point, because that is what loads the front of the knee and builds it. If the sets feel easy, slow the lowering down before you add weight.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Single Leg Hip Bridge Hold; 30 sec/side
2. Alternating Single Arm Split Stance KB Swing; 6-10 reps/side

Working Set 3 - 12-20 reps @30X0 Tempo - RPE 10
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Effort Note:
You may adjust the tempo even more if needing to make this more challenging.

E) Strength Balance (10 min):
3 sets

1. Dual KB/DB Rack Tall Kneel to Stand; 10 reps (5/side alternating)
directly into
2. Dual KB/DB Rack Curtsy Squat; 10 reps (5/side alternating)
rest 90 sec and back to 1.

2. Pancake Stretch; 30 sec
3. Horse Stance Pulse; 30 sec

Saturday, November 7th, 2026

Week 5 Day 6 - Persist PUMP LIFT 5x

A) Daily Focus Notes:
Back Supported DB Arnold Press
Reps are at their lowest of the block, so this is your heaviest Arnold pressing. Start with the palms facing you and turn them out as you press, which takes the front of the shoulder through a longer path than a straight press. Do not rush the turn.
Short on time? Remove Finisher

3 Rounds

Week 5 Day 7 - Persist PUMP LIFT 5x

This week we're talking about program hopping, and why it's costing you more than you think.

You're always changing the program. I see this a lot and I understand why it happens. Six weeks in, progress feels slow, something else looks more interesting, and you convince yourself a fresh start is what you need.

But adaptation takes time. Real, structural change in your body, the kind that shows up in how you look, feel, and perform, happens over months, not weeks. When you switch before anything has had time to work, you're essentially resetting the clock every time.

The best program isn't the most exciting one or the newest one. It's the one you give enough time to actually do something. Stick with it longer than feels comfortable. That's usually right about when things start to shift.

Warmly,
Marcus

Week 5 Day 2 - Persist PUMP LIFT 4x

A) Daily Focus Notes:
Wide Grip Bent Over Barbell Row
The wide grip shortens how far the bar travels and shifts the work toward your upper back and rear delts instead of your lats. Reps come down across the sets this week, so the weight should climb each time. Set your torso angle on the first set and hold it, because the last set is max reps back at your opening weight and that is where position falls apart first.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets

Week 5 Day 4 - Persist PUMP LIFT 4x

A) Daily Focus Notes:
Romanian Deadlift
This is the lowest the reps go on the Romanian all block, so it should be your heaviest hinge of the cycle. The three second lowering is where the hamstrings do their work, so do not rush it to get the set over with. Push your hips back until you feel the stretch behind your knees, then stop, even if the bar is still above your shins.
Short on time? Remove Finisher

B) Warmup (8 min):
2 min Cardio of Choice

Week 5 Day 5 - Persist PUMP LIFT 4x

A) Daily Focus Notes:
Supinated Strict Pullup

Turning your palms toward you brings the biceps in to help, so most people can hold a strict rep longer here than with an overhand grip. Every set is the same number of reps, so the job is to make the sixth set look like the first rather than emptying the tank early. Keep your ribs down and finish with your chest close to the bar, not your chin barely over it.
Short on time? Remove Finisher

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice

Week 5 Day 7 - Persist PUMP LIFT 4x

This week we're talking about program hopping, and why it's costing you more than you think.

You're always changing the program. I see this a lot and I understand why it happens. Six weeks in, progress feels slow, something else looks more interesting, and you convince yourself a fresh start is what you need.

But adaptation takes time. Real, structural change in your body, the kind that shows up in how you look, feel, and perform, happens over months, not weeks. When you switch before anything has had time to work, you're essentially resetting the clock every time.

The best program isn't the most exciting one or the newest one. It's the one you give enough time to actually do something. Stick with it longer than feels comfortable. That's usually right about when things start to shift.

Warmly,

Marcus

Week 5 Day 1 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Wide Grip Bent Over Barbell Row
The wide grip shortens how far the bar travels and shifts the work toward your upper back and rear delts instead of your lats. Reps come down across the sets this week, so the weight should climb each time. Set your torso angle on the first set and hold it, because the last set is max reps back at your opening weight and that is where position falls apart first.
Short on time? Remove Finisher

B) Warmup (8 min):

Week 5 Day 3 - Persist PUMP LIFT 3x

A) Daily Focus Notes:
Close Grip Bench Press
This week adds a second warm up set, and that is not filler. Heavy low rep pressing needs a longer runway than a set of ten does, so use it to rehearse the exact groove you want under the heavier load. When it gets hard your elbows will want to flare out toward your shoulders, and that is the rep where the weight stops moving, so keep them tracking close to your ribs.
Short on time? Remove Finisher

Week 5 Day 1 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Assisted Nordic Hamstring Curl + Russian KB Swing
Reps on the curl are the lowest they have been, so this is the week to take some help away. Fight the lowering for as long as you can, because the slow part is what builds the hamstring here. The swing works the same muscle the opposite way, snapping your hips shut fast, so keep it sharp and let your arms just hang on.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint

Week 5 Day 2 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Incline Dumbbell Chest Fly + Barbell Skullcrushers
Reps are the highest they have been on both moves, so go lighter than you think and let the burn do the work. On the fly, the stretch at the bottom is the part that counts, so lower all the way and take your time getting there. Keep your elbows still on the skullcrusher and let only your forearms move.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

Week 5 Day 3 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Supinated Strict Pullup
Every set is the same number of reps, so the last two are where you find out whether you picked right. The underhand grip brings your biceps in and usually lets you hold a better position than a wide grip. Aim to use less help than you did in Week 3, even if it is only a little.
Short on time? Remove Strength Balance or Increasing Effort based on your goals.

A) Daily Focus Notes:
Dual Kettlebell/Dumbbell Rack Tall Kneel to Stand + Curtsy Squat
Two bells in the front rack is the hardest carry position of this block, and it will be your upper back that quits first, not your legs. Stand up without pushing off your hands, and keep the bells pinned to your body the whole time. On the curtsy, let the back leg cross behind you instead of dropping straight down.

directly into
2. Dual Kettlebell/Dumbbell Rack Curtsy Squat; 10 reps (5/side alternating)
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Anaerobic Power Conditioning (15 min):
4-6 sets
15 Goblet Squat Jump (53/35) @10X0 Tempo (Male/Female)
rest 10 sec
Row 20 sec @ 97% effort
rest walk 1:30-2:00
Effort Note:
The goal is maximal output, do NOT pace. The set range is meant to be adapted based on your physiology. If you are more powerful you will likely perform fewer sets (because the intensity of each set is higher). If you are more endurant, you may need more sets to achieve the desired stimulus (because the intensity of each set is lower).

F) Cooldown (5 min):
1-2 sets

1. Seal Stretch; 30 sec
2. Pancake Stretch; 30 sec
3. Horse Stance Pulse; 30 sec

Week 5 Day 6 - Persist PUMP CONDITION 5x

A) Daily Focus Notes:
Yoga Pushup + Poliquin Lateral Raise
The lateral raise is the one to think about this time. Leaning away from your support keeps tension on the side of your shoulder for the whole rep, where a normal raise gives you a rest at the bottom. Go lighter than you would on a standard raise and lower it slowly, because the extra range is what makes this version work.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Prone Behind the Neck Press; 6-8 reps
3. Dumbbell Bent Over Row Isometric; 15 sec

C) Strength Intensity 1 (15 min):
Barbell Z Press
4 Working Sets; rest 2 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 6 reps @20X1 Tempo - RPE 7
Working Set 2 - 6 reps @20X1 Tempo - RPE 8
Working Set 3 - 6 reps @20X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (10 min):
3 sets
1. Yoga Pushup; 6-10 reps
rest 30 sec
2. Poliquin Lateral Raise; 10-12 reps @30X0 Tempo
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

E) Functional Pump Conditioning (15 min):
5 min AMRAP
30 Double Unders (use a weighted rope if you have one)
10 Dumbbell Hang Power Cleans (50/35) (Male/Female)
10 Dumbbell Push Press (50/35)
5 Strict Toes to Bar or 10 Hanging Knee Tucks
rest 2 min; then repeat for a second 5 min AMRAP.
Effort Note:
The pace should be slightly higher than the 12 minutes of work last week, thus the 2 minutes of rest between AMRAPs. Aim for consistent pacing between the first and second AMRAP.

F) Cooldown (5 min):
1-2 sets
1. Theraband Around the World; 6-10 reps
2. Supinated Passive Hang; 30 sec
3. PVC Shoulder Extension Stretch; 30-60 sec

Week 5 Day 7 - Persist PUMP CONDITION 5x

This week we're talking about program hopping, and why it's costing you more than you think.

You're always changing the program. I see this a lot and I understand why it happens. Six weeks in, progress feels slow, something else looks more interesting, and you convince yourself a fresh start is what you need.

But adaptation takes time. Real, structural change in your body, the kind that shows up in how you look, feel, and perform, happens over months, not weeks. When you switch before anything has had time to work, you're essentially resetting the clock every time.

The best program isn't the most exciting one or the newest one. It's the one you give enough time to actually do something. Stick with it longer than feels comfortable. That's usually right about when things start to shift.

Warmly,
Marcus

Week 5 Day 1 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Assisted Nordic Hamstring Curl + Russian KB Swing
Reps on the curl are the lowest they have been, so this is the week to take some help away. Fight the lowering for as long as you can, because the slow part is what builds the hamstring here. The swing works the same muscle the opposite way, snapping your hips shut fast, so keep it sharp and let your arms just hang on.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
2. Goblet Heel Sits; 10 reps
3. Lower Switch Cossack Squat; 6 reps/side

C) Strength Intensity (15 min):
Back Squat
3 Working Sets; rest 2-3 min

Working Set 1 - 2 reps @33X1 Tempo - RPE 7

RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (12 min):
3 sets
1. Assisted Nordic Hamstring Curl or BC Gliding Hamstring Curl; 5 reps @30X0 Tempo
rest 60 sec

Effort Note: Perform at a sustainable pace. You may break up the weighted movements as needed to keep quality high. Make sure that you can sustain a good pace on the Row each round.

F) Cooldown (5 min):
1-2 sets
1. Foot Elevated Hamstring Stretch; 30 sec/side
2. Dynamic Couch Stretch; 30 sec/side
3. Hip Sleeper Stretch; 30 sec/side

Week 5 Day 2 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Incline Dumbbell Chest Fly + Barbell Skullcrushers
Reps are the highest they have been on both moves, so go lighter than you think and let the burn do the work. On the fly, the stretch at the bottom is the part that counts, so lower all the way and take your time getting there. Keep your elbows still on the skullcrusher and let only your forearms move.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets

Week 5 Day 4 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Dual Kettlebell/Dumbbell Rack Tall Kneel to Stand + Curtsy Squat
Two bells in the front rack is the hardest carry position of this block, and it will be your upper back that quits first, not your legs. Stand up without pushing off your hands, and keep the bells pinned to your body the whole time. On the curtsy, let the back leg cross behind you instead of dropping straight down.
Short on time? Remove Strength Balance or Anaerobic Power Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Single Leg Hip Bridge Hold; 30 sec/side
2. Alternating Single Arm Split Stance Kettlebell Swing; 6-10 reps/side

C) Strength Intensity (12 min):
Romanian Deadlift
3 Working Sets; rest 2-3 min
Warm-Up Set - 10 reps @30X0 Tempo - Easy
Working Set 1 - 6 reps @30X0 Tempo - RPE 7
Working Set 2 - 6 reps @30X0 Tempo - RPE 8

2. Pancake Stretch; 30 sec
3. Horse Stance Pulse; 30 sec

Week 5 Day 5 - Persist PUMP CONDITION 4x

A) Daily Focus Notes:
Supinated Strict Pullup
Every set is the same number of reps, so the last two are where you find out whether you picked right. The underhand grip brings your biceps in and usually lets you hold a better position than a wide grip. Aim to use less help than you did in Week 3, even if it is only a little.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Prone Behind the Neck Press; 6-8 reps

3. Dumbbell Bent Over Row Isometric; 15 sec

C) Strength Intensity (15 min):
Barbell Z Press
4 Working Sets; rest 2 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 6 reps @20X1 Tempo - RPE 7
Working Set 2 - 6 reps @20X1 Tempo - RPE 8
Working Set 3 - 6 reps @20X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

D) Strength Balance (8 min):
Supinated Strict Pullup
Every 75 sec x 6 sets
Set 1: 6 reps @20X0 Tempo - RPE 7
Set 2: 6 reps @20X0 Tempo - RPE 7
Set 3: 6 reps @20X0 Tempo - RPE 8
Set 4: 6 reps @20X0 Tempo - RPE 8
Set 5: 6 reps @20X0 Tempo - RPE 9
Set 6: 6 reps @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.
Loading Note: This is a high density format. Select assistance consistent with about a 12 rep max pullup. The format will remain the same for all odd weeks, aim to decrease assistance or improve quality throughout this training block.

E) Functional Pump Conditioning (15 min):
5 min AMRAP
30 Double Unders (use a weighted rope if you have one)
10 Dumbbell Hang Power Cleans (50/35) (Male/Female)
10 Dumbbell Push Press (50/35)
5 Strict Toes to Bar or 10 Hanging Knee Tucks
rest 2 min; then repeat for a second 5 min AMRAP.
Effort Note: The pace should be slightly higher than the 12 minutes of work last week, thus the 2 minutes of rest between AMRAPs. Aim for consistent pacing between the first and second AMRAP.

F) Cooldown (5 min):
1-2 sets
1. Theraband Around the World; 6-10 reps

2. Supinated Passive Hang; 30 sec

Week 5 Day 1 - Persist PUMP CONDITION 3x

A) Daily Focus Notes:
Incline Dumbbell Bench Press + Barbell Skullcrushers
Reps are at their lowest on both moves this week, so this should be the heaviest you handle either of them all block. The incline angle shifts the work up toward the top of your chest and the front of your shoulder, so do not expect your flat bench numbers here. Three seconds down still applies on both, and going heavier is not a reason to start rushing the lowering.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice

3 Sets
1. 15 sec Cardio Sprint

Week 5 Day 5 - Persist PUMP CONDITION 3x

A) Daily Focus Notes:
Barbell Z Press + Poliquin Lateral Raise
Sitting on the floor with your legs straight takes away every bit of help from your hips and lower back, so this is honest overhead strength. Reps are at their lowest on the press this week, which makes it your heaviest Z Press of the block, so get your ribs down and your midline tight before the bar moves. If you find yourself leaning back to get it up, the weight is too heavy.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Dumbbell Seated Goodmorning; 8-12 reps

Week 5 Day 1 - Persist PERFORM

A) Daily Focus Notes:
Low Hang Clean
Singles of the low hang clean every two to three minutes across five sets. Starting from just below the knee removes the floor and forces you to create speed from a short range, which sharpens the second pull and the turnover under the bar. Keep the chest over the bar as long as you can, then pull yourself under fast and catch it tall in the rack. Sets 1 and 2 are easy, 3 and 4 moderate, and 5 challenging, so use the early sets to find the position before the weight climbs.

Week 5 Day 2 - Persist PERFORM

A) Daily Focus Notes:
Incline Dumbbell Chest Fly + Barbell Skullcrushers
This is a super set for the chest and triceps. Reps are at their highest of the cycle this week at fifteen on both movements, so the weight comes down and the time under tension goes up. Keep the three second lower honest on every rep, because the last few are where the set is actually made. Push both close to failure with only thirty seconds between them.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

Week 5 Day 3 - Persist PERFORM

A) Daily Focus Notes:
Power Snatch

Doubles of the power snatch every two minutes across five sets. The power snatch catches the bar overhead above parallel, so it rewards a fast, aggressive pull and a hard punch into the lockout rather than a deep catch. Keep the bar close through the pull and finish the hips before the arms do anything. Sets 1 and 2 are easy, 3 and 4 moderate, and 5 challenging, so build the speed before you build the weight.
Short on time? Remove Strength Balance or Power Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Dumbbell Seated Goodmorning; 8-12 reps

Week 5 Day 5 - Persist PERFORM

A) Daily Focus Notes:
Dual Rack Tall Kneel to Stand + Dual Rack Curtsy Squat
This is a super set for the legs and the trunk. Both movements are held in a dual rack, two bells at the shoulders, which is the hardest rack position of the block and asks a lot of the midline. The tall kneel to stand drives you up off one knee at a time, then the curtsy squat crosses the back leg

behind to load the glute from a different angle. There is no rest between them, so choose a load you can hold in the rack for all twenty reps.
Short on time? Remove Strength Balance or Barbell Cycling based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Single Leg Hip Bridge Hold; 30 sec/side
2. Alternating Single Arm Split Stance Kettlebell Swing; 6-10 reps/side

Working Set 2 - 7 reps/side @20X0 Tempo - RPE 8
Working Set 3 - 5 reps/side @20X0 Tempo - RPE 9
RPE = Rate of Perceived Exertion - scale of 10, where 10 is form failure.

Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

F) Barbell Cycling (12 min):
3 sets @ High Effort
Bike 15/12 Calories (Male/Female)

Power Snatch x 4 (95/65)

Saturday, November 7th, 2026

Week 5 Day 6 - Persist PERFORM

A) Daily Focus Notes:
Poliquin Lateral Raise
This is a super set for the shoulders, and the pairing repeats from Week 2 unchanged. The focus this time is the Poliquin lateral raise: lean away from the upright and lift slowly enough that the work stays in the side delt instead of turning into a shrug. The three second lower is where most of that set is made, so control the arm all the way down. The block does not change, so the progress has to come from more load or better reps than Week 2.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Prone Behind the Neck Press; 6-8 reps
3. Dumbbell Bent Over Row Isometric; 15 sec

C) Upper HOT START (10 min):
4 Rounds - Increasing your bike pace on each round
15/12 Calories Bike (Male/Female)
2 Supinated Chest to Bar Strict Pullup
5 Plyo Pushup to Plates
2 Supinated Chest to Bar Strict Pullup
Intention Note:

Start easy and gradually build up speed and intensity. The pullups are broken up to keep quality high, focus on a fast pullup with a controlled lower.

D) Strength Intensity 1 (15 min):
Barbell Z Press
4 Working Sets; rest 2 min
Warm-Up Set - 10 reps @20X1 Tempo - Easy
Working Set 1 - 6 reps @20X1 Tempo - RPE 7
Working Set 2 - 6 reps @20X1 Tempo - RPE 8
Working Set 3 - 6 reps @20X1 Tempo - RPE 9
Working Set 4 - Max Unbroken reps @20X1 Tempo - RPE 10 - Set 1 weight.

E) Strength Balance (10 min):
3 sets
1. Yoga Pushup; 6-10 reps
rest 30 sec
2. Poliquin Lateral Raise; 10-12 reps @30X0 Tempo
rest 90 sec and back to 1.
Loading Note:
Perform 1-2 warmup sets to determine starting weight. Aim for each set to be close to failure.

F) Functional Pump Conditioning (12-15 min):
5 min AMRAP
30 Double Unders (use a weighted rope if you have one)
10 Dumbbell Hang Power Cleans (50/35) (Male/Female)
10 Dumbbell Push Press (50/35)
5 Strict Toes to Bar or 10 Hanging Knee Tucks
rest 2 min; then repeat for a second 5 min AMRAP.
Effort Note:
The pace should be slightly higher than the 12 minutes of work last week, thus the 2 minutes of rest between AMRAPs. Aim for consistent pacing between the first and second AMRAP.

G) Cooldown (5 min):
1-2 sets
1. Theraband Around the World; 6-10 reps
2. Supinated Passive Hang; 30 sec
3. PVC Shoulder Extension Stretch; 30-60 sec

Week 5 Day 7 - Persist PERFORM

This week we're talking about program hopping, and why it's costing you more than you think.

You're always changing the program. I see this a lot and I understand why it happens. Six weeks in, progress feels slow, something else looks more interesting, and you convince yourself a fresh start is what you need.

But adaptation takes time. Real, structural change in your body, the kind that shows up in how you look, feel, and perform, happens over months, not weeks. When you switch before anything has had time to work, you're essentially resetting the clock every time.

The best program isn't the most exciting one or the newest one. It's the one you give enough time to actually do something. Stick with it longer than feels comfortable. That's usually right about when things start to shift.

Warmly,
Marcus

Week 5 Day 1 - Persist MINIMALIST

A) Daily Focus Notes:
Slide Hamstring Curls + Single Arm Dumbbell Swing
The hamstring curl works the back of your leg by bending the knee, which the squats and lunges never do. Keep your hips up the whole time, because letting them drop turns it into a bridge and takes the hamstrings out of it. The single arm swing then trains the same muscles the fast way, driving from the hips rather than lifting with the arm. If the slide curl is too hard, hold the hamstring plank for thirty seconds instead.
Short on time? Remove Strength Balance or Aerobic Lower Body based on your goals.

B) Warmup (8 min):

2 min Cardio of Choice
3 Sets
1. 15 sec Cardio Sprint
2. Goblet Heel Sits; 10 reps

Tuesday, November 3rd, 2026

Week 5 Day 2 - Persist MINIMALIST

A) Daily Focus Notes:
Incline Dumbbell Chest Fly + Dumbbell Skullcrushers
Setting the bench on an incline moves the fly onto the upper chest, which the flat version barely reaches. Three seconds down, arms wide, and stop at the stretch rather than dropping into the shoulder. The skullcrushers then load the long head of the triceps on the same tempo, so keep your elbows pointed at the ceiling and let only your forearms move. Reps are the lowest of the three, so the weight should be the heaviest.
Short on time? Remove Strength Balance or Press Core Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Single Arm Plank; 15-25 sec/side

Week 5 Day 4 - Persist MINIMALIST

A) Daily Focus Notes:
Dual Dumbbell Rack Tall Kneel to Stand + Dual Dumbbell Rack Curtsy Squat

Two bells in the front rack is the hardest carry position of this block, and it will be your upper back that quits first, not your legs. Stand up without pushing off your hands, and keep the bells pinned to your body the whole time. On the curtsy, let the back leg cross behind you instead of dropping straight down.
Short on time? Remove Strength Balance or Anaerobic Power Conditioning based on your goals.

B) Warmup (8 min):
2 min Cardio of Choice
3 Sets
1. Single Leg Hip Bridge Hold; 30 sec/side
2. Alternating Single Arm Split Stance Kettlebell Swing; 6-10 reps/side

E) Anaerobic Power Conditioning (15 min):
5 sets
15 Goblet Squat Jump
12 Skater Jumps (6/side)
8 Burpees
rest walk 90 sec
Effort Note:
The goal is maximal output, do NOT pace. All 5 sets should be at the same maximal effort, so take the full rest walk between them.

F) Cooldown (5 min):
1-2 sets
1. Seal Stretch; 30 sec
2. Pancake Stretch; 30 sec
3. Horse Stance Pulse; 30 sec

Friday, November 6th, 2026

Week 5 Day 5 - Persist MINIMALIST

A) Daily Focus Notes:
Yoga Pushup + Poliquin Lateral Raise
The lateral raise is the one to think about this time. Leaning away from your support keeps tension on the side of your shoulder for the whole rep, where a normal raise gives you a rest at the bottom. Go lighter than you would on a standard raise and lower it slowly, because the extra range is what makes this version work.
Short on time? Remove Strength Balance or Functional Pump Conditioning based on your goals.

B) Warmup (8 min):
3 Rounds
1. 90 sec Cardio of Choice
2. Prone Behind the Neck Press; 6-8 reps
3. Dumbbell Bent Over Row Isometric; 15 sec
